Volume List Properties

The Volume List Properties pane displays information relevant to the Customer and Media Type being displayed in the Volume List.

The Volume List Properties Window can be set to or not to display by toggling the menu item in the View Menu.

The Volume List Properties Window is broken into four sections: Scope, List Options, Library Health, and Library Statistics.

Scope

The Scope field displays which Customer and Media Type are currently selected and being displayed in the Volume List.

List Options

The List Options field provides display options for the Volume List.

- **Hide un-selected**: If set to **True**, the Volume List will only display Volumes that are currently selected. The Hide un-selected text is also a button.
- **Date Format**: The Date Format field uses standard Date Format Codes to configure how the date is displayed in the Move Date column of the Volume List.
- **Attribute Field**: The Attribute Field drop down menu changes the Attribute that is displayed in the description column in the Volume List

Library Health

The Library Health field displays the current Library Health Score with a graphical depiction,

description, and a report of problems. For more information, see: Library Health.

Library Statistics

The Library Statistics field displays the total number of Volumes in each Repository and how many Volumes are moving in and out of each Repository.
