Paste Value By ID

Paste value by ID allows you to paste in attribute or next move values from the clipboard by volume ID.

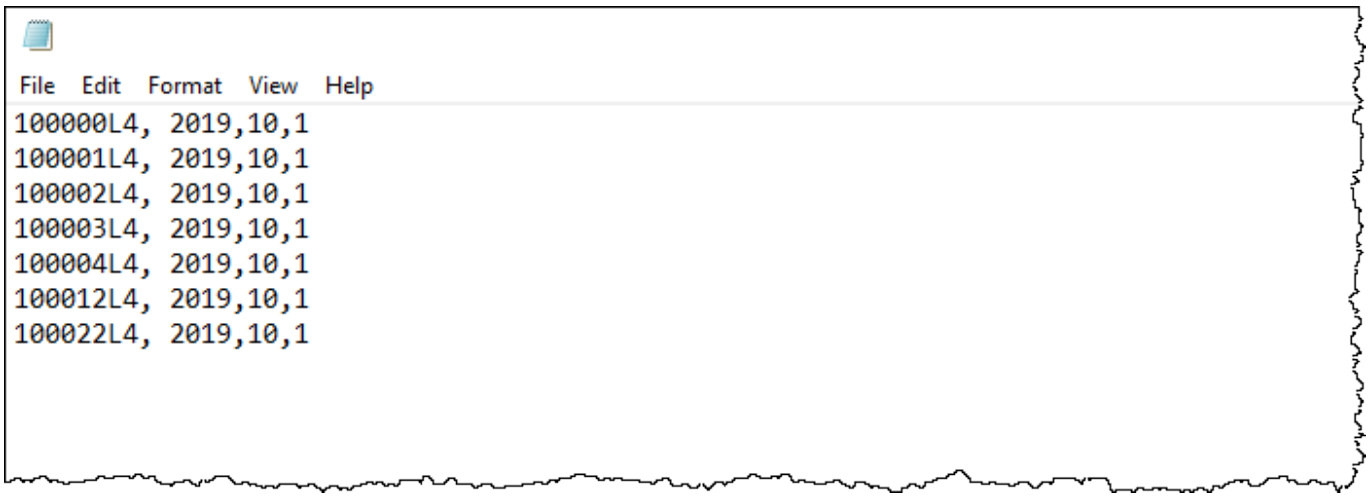

Copy Values to Clipboard

Select volume ID's and values (attributes or next move dates) and copy to windows clipboard from file (text, CSV or Excel) or email.

Attribute Values

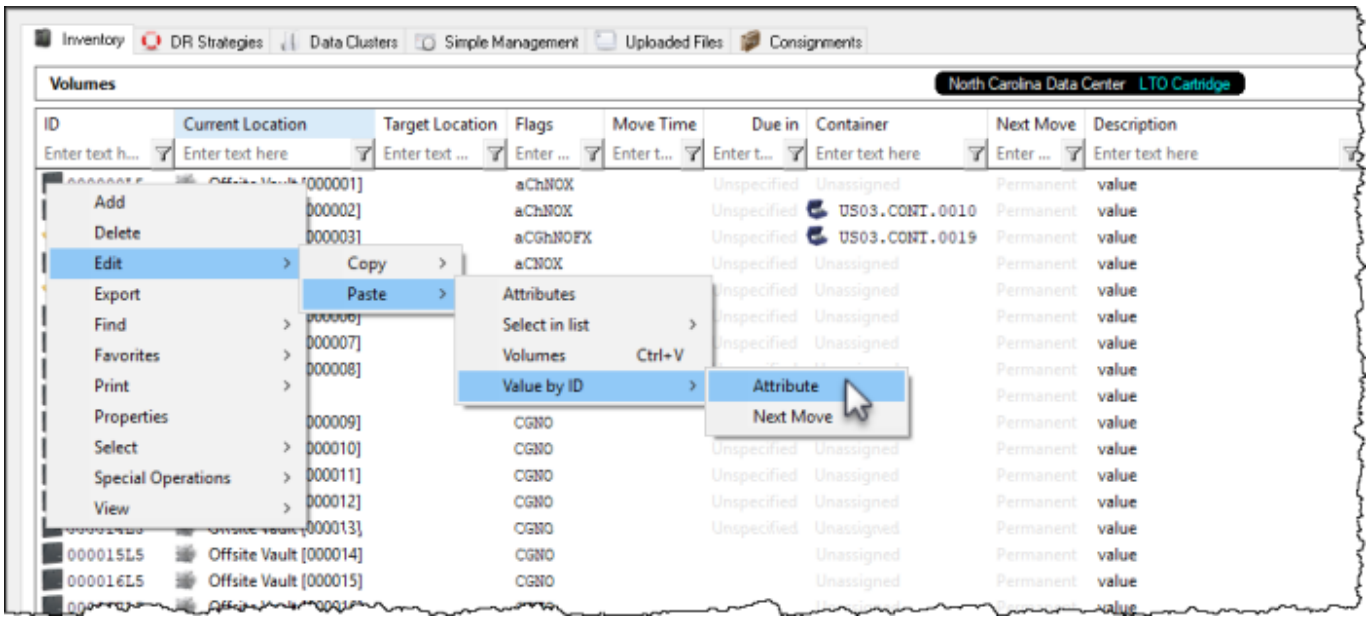

Movedate Values

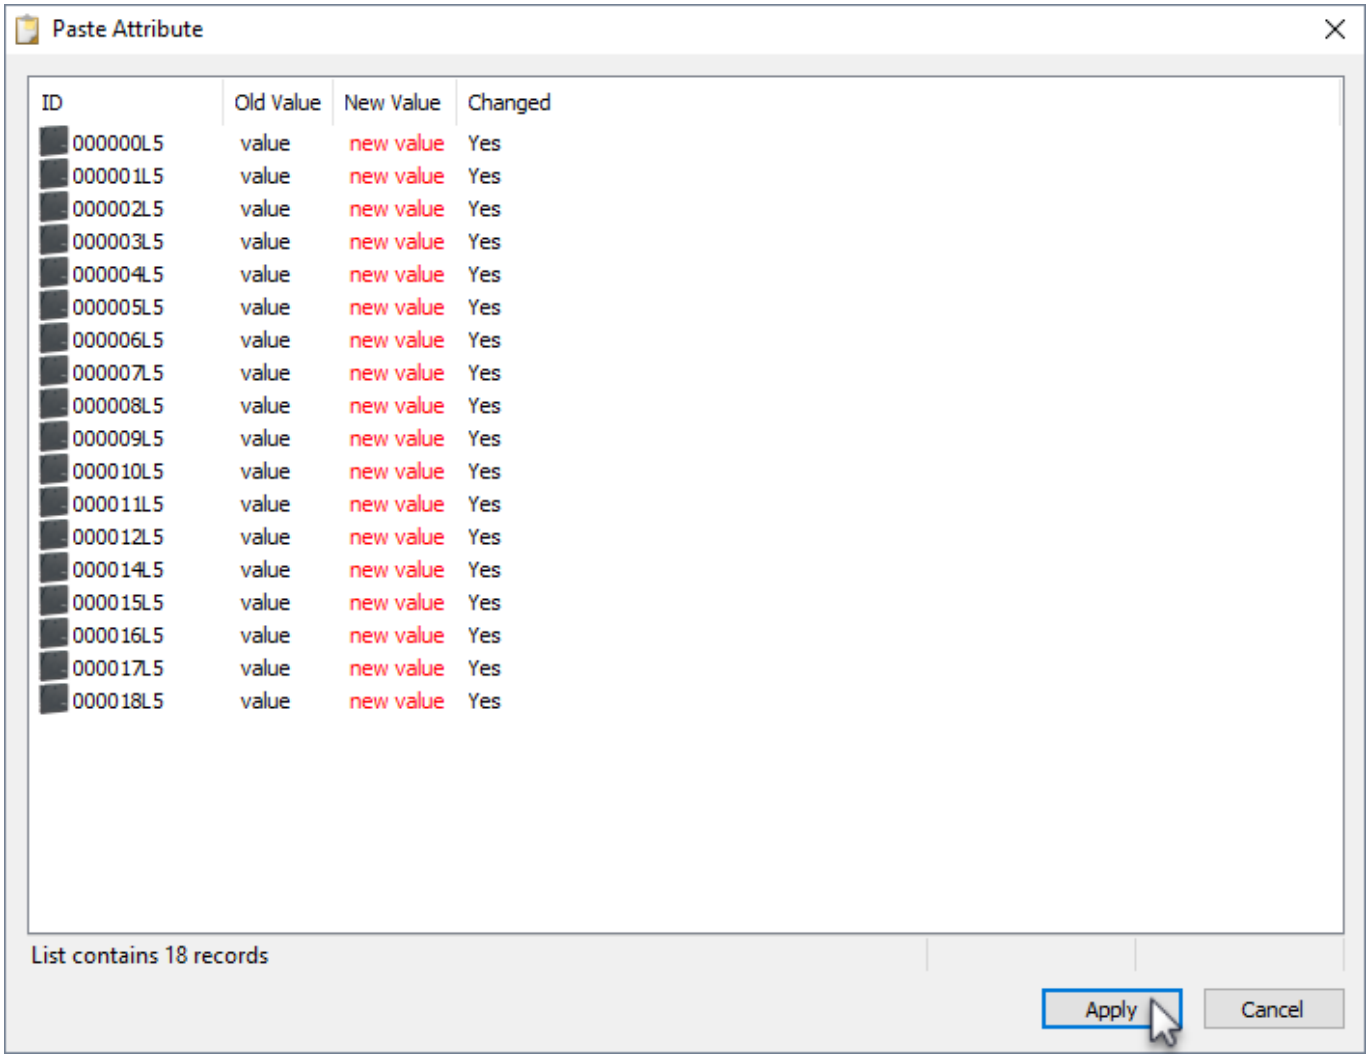

Paste Values from Clipboard

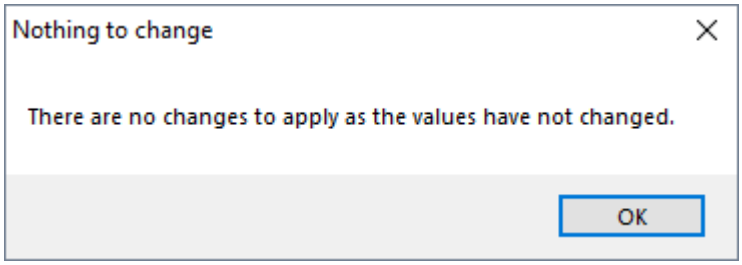

In the required media type, right click in the inventory window and select `Edit→Paste→Value by ID` and then either `Attribute` or `Next Move`.

This will open the **Paste Attribute** window with the volume ID's, old values and the new or updated values. If the information displayed is correct, click `Apply` to commit the data.

If there is no new data to apply to the volumes you will receive a popup stating **There are no changes to apply as the values have not changed**
