Paste Value By ID

Paste value by ID allows you to paste in attribute or next move values from the clipboard by Volume-ID.

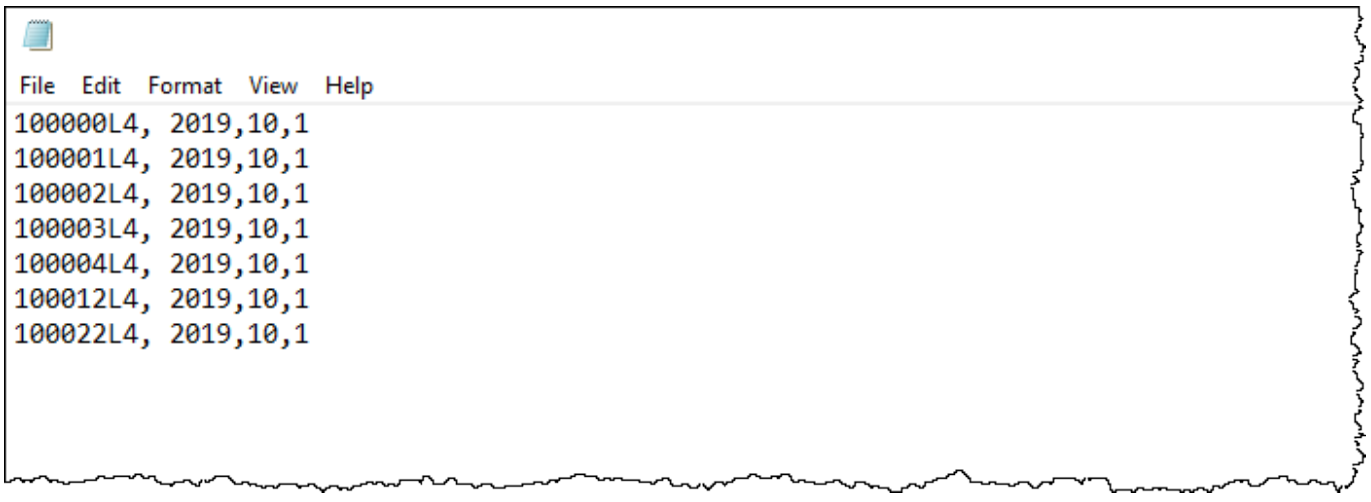

Copy Values to Clipboard

Select Volume-ID's and values (attributes or next move dates) and copy to windows clipboard from file (text, CSV or Excel) or email.

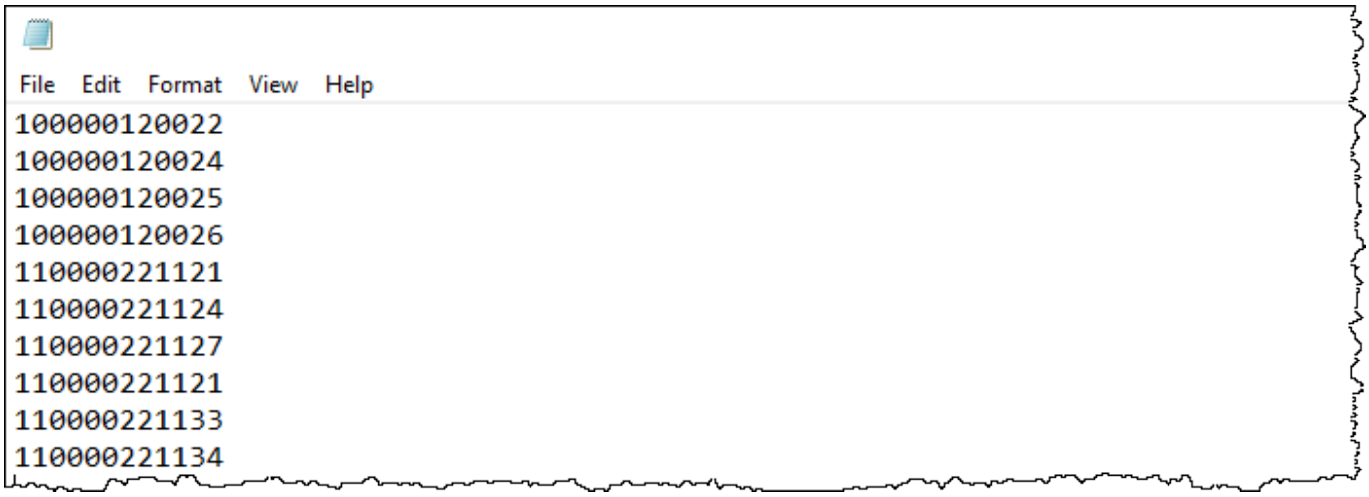

Attribute Values

Movedate Values

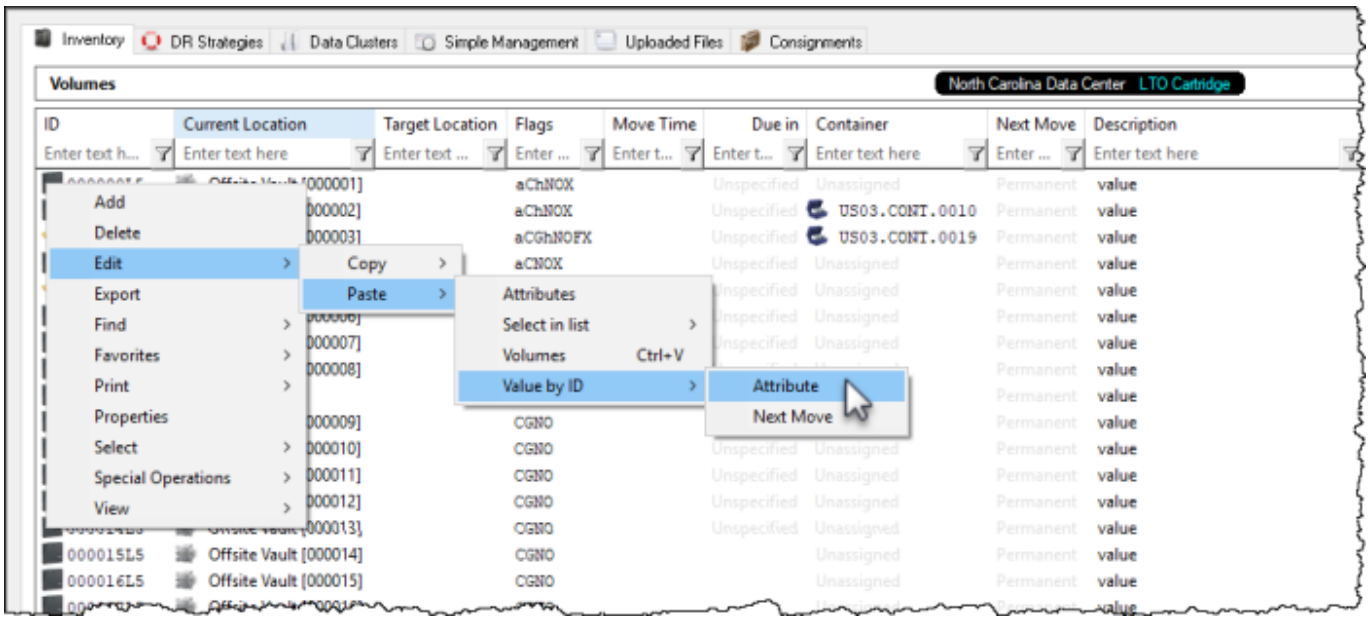

Long Barcode Values

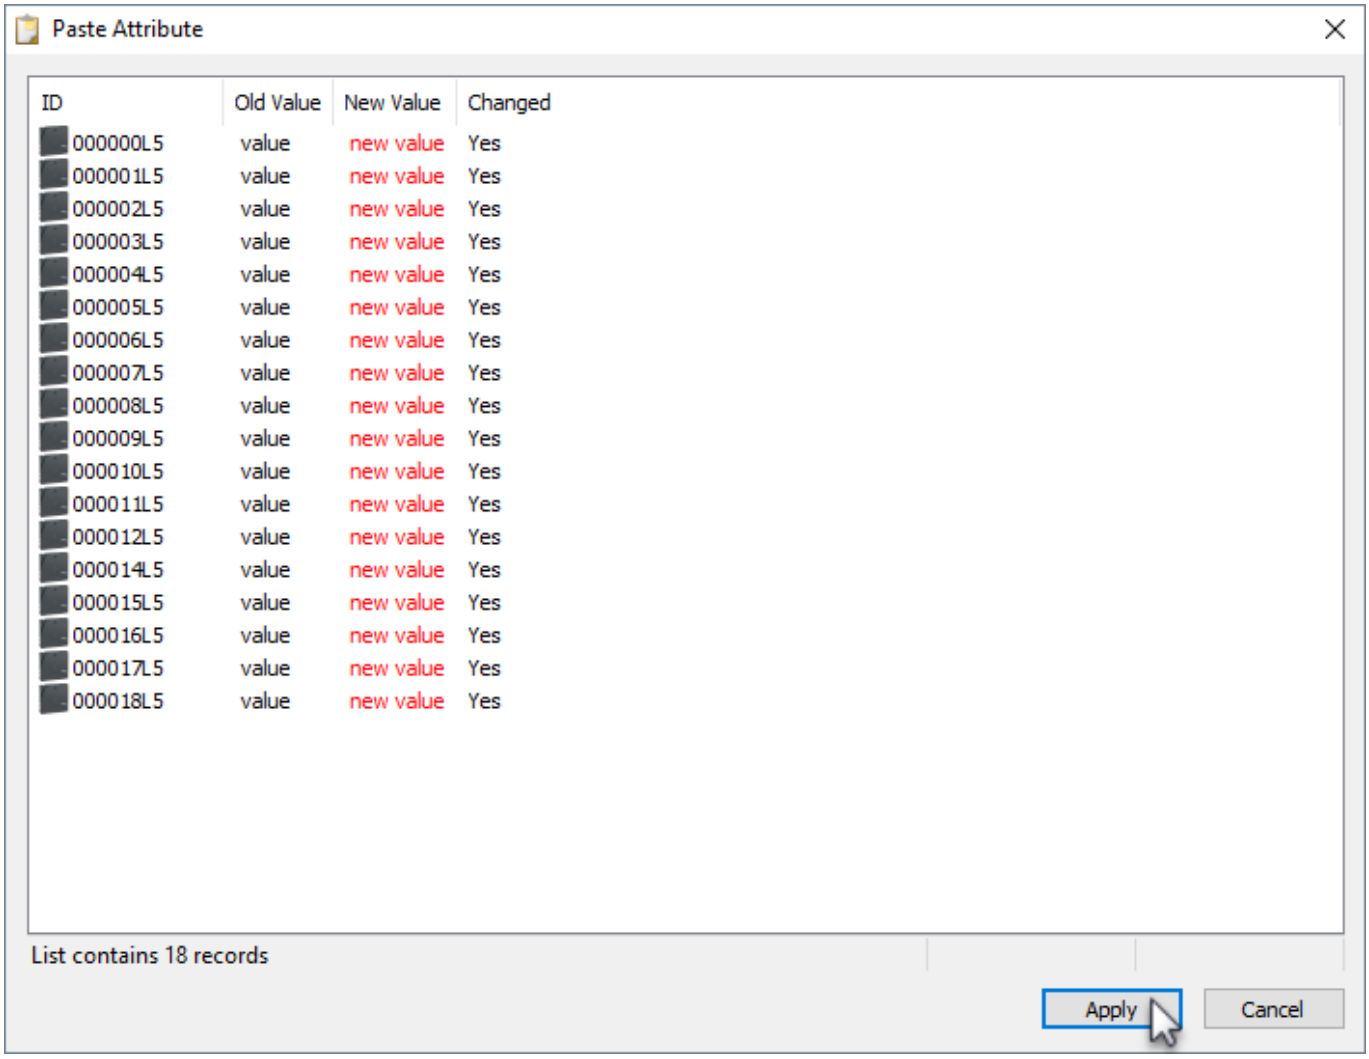

Long Barcodes in hashed format and extended attribute `Long Barcode` must exist in TapeTrack before pasting in values

Paste Values from Clipboard

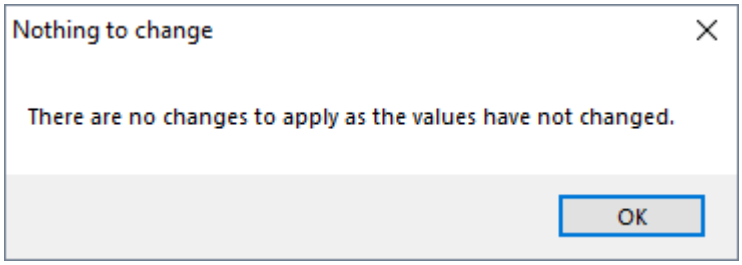

In the required media type, right click in the inventory window and select `Edit→Paste→Value by ID` and then either `Attribute`, `Long Barcode` or `Next Move`.

This will open the **Paste Attribute** window with the Volume-ID's, old values and the new or updated values. If the information displayed is correct, click `Apply` to commit the data.

If there is no new data to apply to the volumes you will receive a popup stating **There are no changes to apply as the values have not changed**
