

Paste Value By ID

Paste value by ID allows you to paste in Attribute or next move values from the clipboard by Volume-ID.

Copy Values to Clipboard

Select Volume-ID's and values (Attributes or next move dates) and copy to windows clipboard from file (text, CSV or Excel) or email.

Attribute Values

Movedate Values

Long Barcode Values

Long Barcodes in hashed format and extended Attribute Long Barcode must exist in TapeTrack before pasting in values

Paste Values from Clipboard

In the required media type, right click in the inventory window and select Edit→Paste→Value by ID and then either Attribute, Long Barcode or Next Move.

This will open the **Paste Attribute** window with the Volume-ID's, old values and the new or updated values. If the information displayed is correct, click Apply to commit the data.

Paste Attribute

ID	Old Value	New Value	Changed
000000L5	value	new value	Yes
000001L5	value	new value	Yes
000002L5	value	new value	Yes
000003L5	value	new value	Yes
000004L5	value	new value	Yes
000005L5	value	new value	Yes
000006L5	value	new value	Yes
000007L5	value	new value	Yes
000008L5	value	new value	Yes
000009L5	value	new value	Yes
000010L5	value	new value	Yes
000011L5	value	new value	Yes
000012L5	value	new value	Yes
000014L5	value	new value	Yes
000015L5	value	new value	Yes
000016L5	value	new value	Yes
000017L5	value	new value	Yes
000018L5	value	new value	Yes

List contains 18 records

Apply

Cancel

If there is no new data to apply to the volumes you will receive a popup stating **There are no changes to apply as the values have not changed**

Nothing to change

There are no changes to apply as the values have not changed.

OK
