Volume Properties Window

The **Volume Properties Window** contains information and administrative controls for each individual Volume. It can be accessed by right-clicking on a Volume in the Volume List and selecting Properties. This can also be done by either hitting the space bar on your keyboard or double-clicking the a Volume in the Volume List.

There are twelve tabs in the Volume Properties Window.

- **Identity**: Displays the Customer-ID, Media-ID and Volume-ID for the selected Volume.
- **Target Location**: Displays the Repository and Slot that a Volume is moving to if it is in a Move. If a Volume is not in a Move, this will be the same as the Current Location.
- **Current Location**: Displays the Repository and Slot where a Volume was last confirmed. If a Volume is not in a Move, this will be the Repository where the Volume should physically be.
- **Scanned Location**: Displays the Repository and Slot where a Volume was last scanned or confirmed. If a Volume is not in a Move, this will be the Repository that the Volume is from.
- **Notes**: Displays Notes about the selected Volume.
- **History**: Displays all transactions that have occurred with the selected Volume, including Date,

Time, Repository moved from, and Repository moved to.

- **Datasets**: Displays a list of Datasets associated with the selected Volume.
- **Attributes**: Used to set Attributes for a selected Volume.
- **VeriScore™**: Displays VeriScore™ information for each Volume.
- **DR Strategies**: Displays which Disaster Recovery Strategies a Volume is associated with.
- **Options**: Provides a list of configuration options for each Volume.
- **Catalog**:
