

Special Operations Menu

The **Special Operations Menu** provides advanced functions for [Volumes](#).

Operations

- **Add Note:** The **Add Note** function will launch the **Add Note** window.
- **Check for Duplicate within Customer:** The “Check for Duplicate within Customer” will search the current **Customer** for **Volumes** with the same **Volume-ID** as the selected **Volume** in all media types.
- **Confirm:** The “Confirm” operation confirms the selected **Volume** at its Target Location when it is in a move.
- **Container:** The Container Menu provides three options:
 - Register: Register will add the designation of “Container” to a Volume.
 - De-Register: De-Register will remove the designation of “Container” from a **Volume**.
 - Purge: Purge will remove all **Volumes** from a Container.
- **Detect missing volumes in a sequence** will scan through the selected **Volumes** and list any Volume-ID's missing from the numerical sequence.
- **Find Duplicate Slots:** The “Find Duplicate Slots” will find **Volumes** that have been assigned to the same Slot as another **Volume**.

- **Modify:** The Modify Menu contains options to:
 - [Add a Volume to a Container](#)
 - [Add a Volume to a Data Cluster](#)
 - [Set a Volume's Home Repository](#)
 - [Modify Flags](#)
 - [Modify Return Dates](#).
- **Scan:** The Scan menu contains options to :
 - **Scan to Add Volumes:** The “Scan to Add Volumes” Function will launch the [Barcode Scanning Window](#) and add the [Volumes](#) being scanned to the selected [Customer](#) and [Media Type](#).
 - **Scan to Select Volumes:** The “Scan to Select Volumes” function will launch the [Barcode Scanning Window](#) and select the [Volumes](#) being scanned in the [Volume List](#).
 - **Search Next Move Dates** opens the Next Move Date Search window. This enables you to search for tapes moving on a certain day or days within the current media.
- **Show Move Dates in Month View:** The Show Move Dates in Month View function will launch a window displaying the [move](#) dates for the selected [Volume\(s\)](#) in a calendar format.
- **Slots**
 - **Find Duplicate Slots** will search the current [Media Type](#) for any slots occupied by multiple [Volumes](#).
