Special Operations Menu

The **Special Operations Menu** provides advanced functions for Volumes.

image.png

Operations

- **Add Note**: The Add Note function will launch the Add Note window.
- **Check for Duplicate within Customer**: The “Check for Duplicate within Customer” will search the current Customer for Volumes with the same Volume-ID as the selected Volume.
- **Confirm**: The “Confirm” operation confirms the selected Volume at its Target Location when it is in a move.
- **Find Duplicate Slots**: The “Find Duplicate Slots” will find Volumes that have been assigned to the same Slot as another Volume.
- **Modify**: The Modify Menu contains options to Add a Volume to a Container, Add a Volume to a Data Cluster, Set a Volume's Home Repository, Modify Flags, and Modify Return Dates.
- **Container**: The Container Menu provides three options: Register, De-Register, and Purge. Register will add the designation of “Container” to a Volume. De-Register will remove the designation of “Container” from a Volume. Purge will remove all Volumes from a Container.
- **Scan to Add Volumes**: The “Scan to Add Volumes” Function will launch the Barcode Scanning Window and add the Volumes being scanned to the selected Customer and Media Type.
- **Scan to Select Volumes**: The “Scan to Select Volumes” function will launch the Barcode Scanning Window and select the Volumes being scanned in the Volume List.
- **Show Move Dates in Month View**: The “Show Move Dates in Month View” function will launch a window displaying the move dates for the selected Volume(s) in a calendar format.
