# Data Cluster

A Data Cluster is an arbitrary grouping of Volumes that does not depend on sequential or similar Volume-IDs.

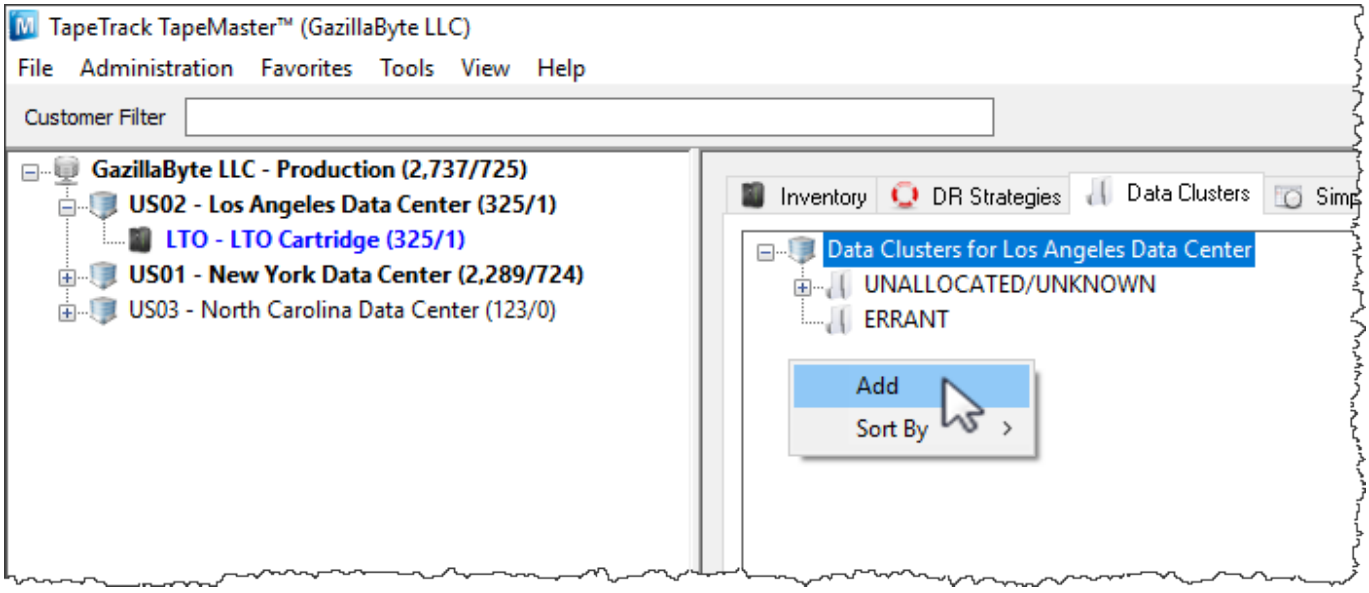

They can be used in combination with Simple Management Rules to coordinate Volume movements.

## Adding A Data Cluster

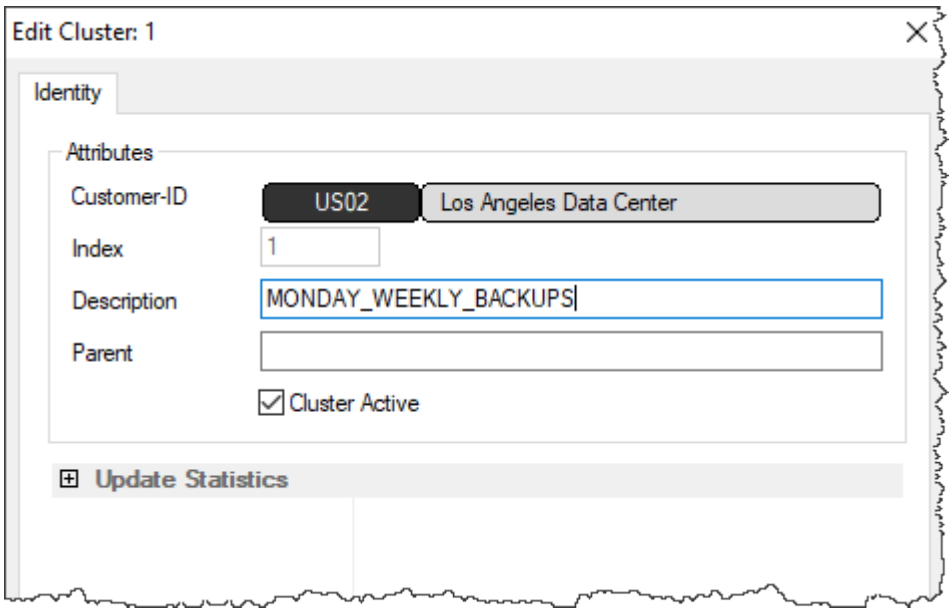

To add a Data Cluster: In TapeMaster, open the Media type of the required Customer and select the Data Clusters Administrative Tab.

Right-click inside the Data Clusters Administrative Tab and select Add or use the Insert key on the keyboard.

Fill out a brief description of this Data Cluster and, if necessary, insert a Parent Data Cluster for this

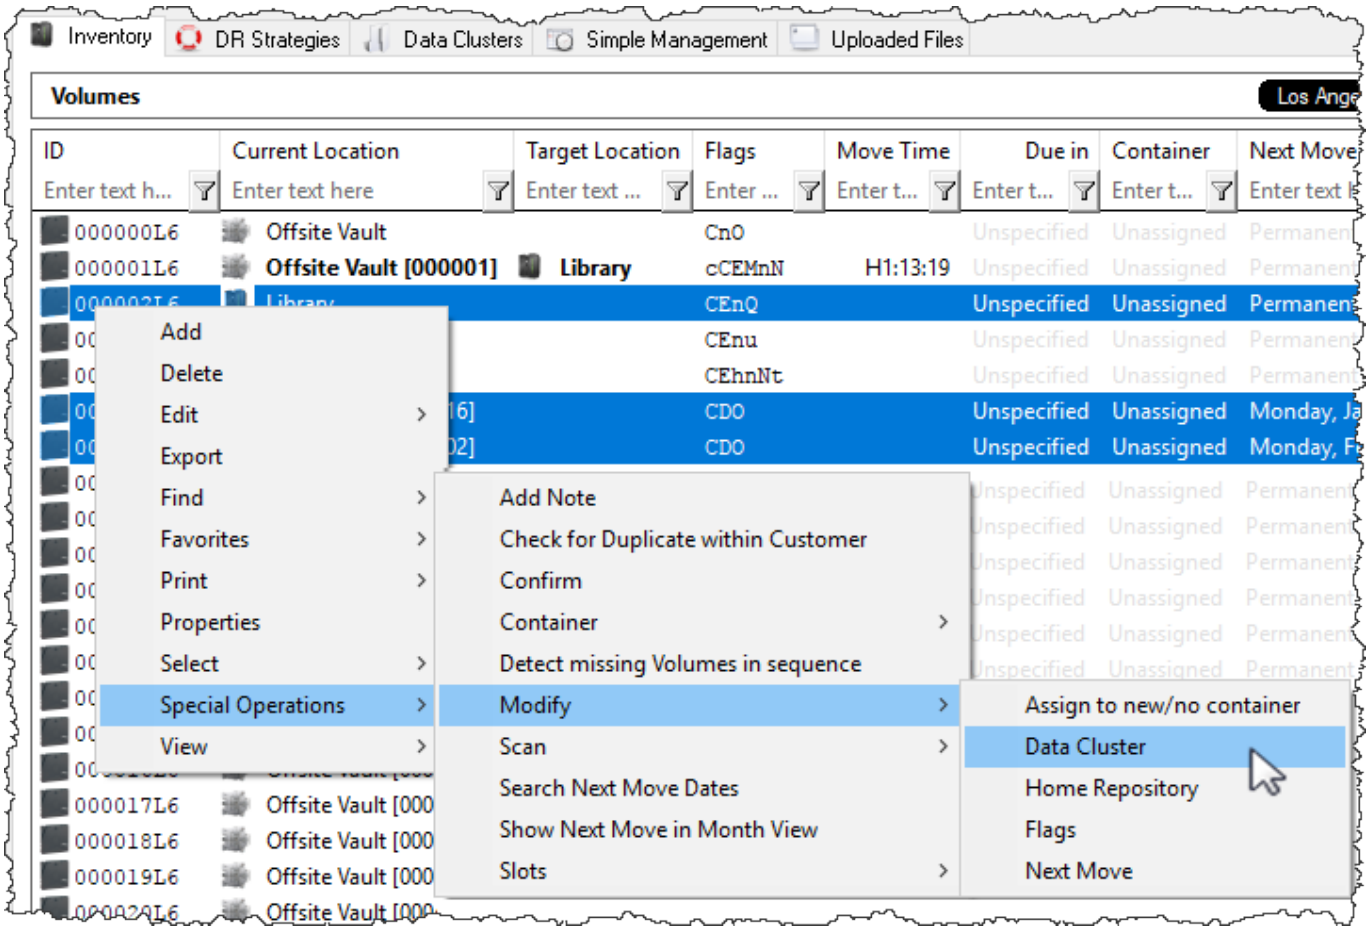

Data Cluster to be nested under.

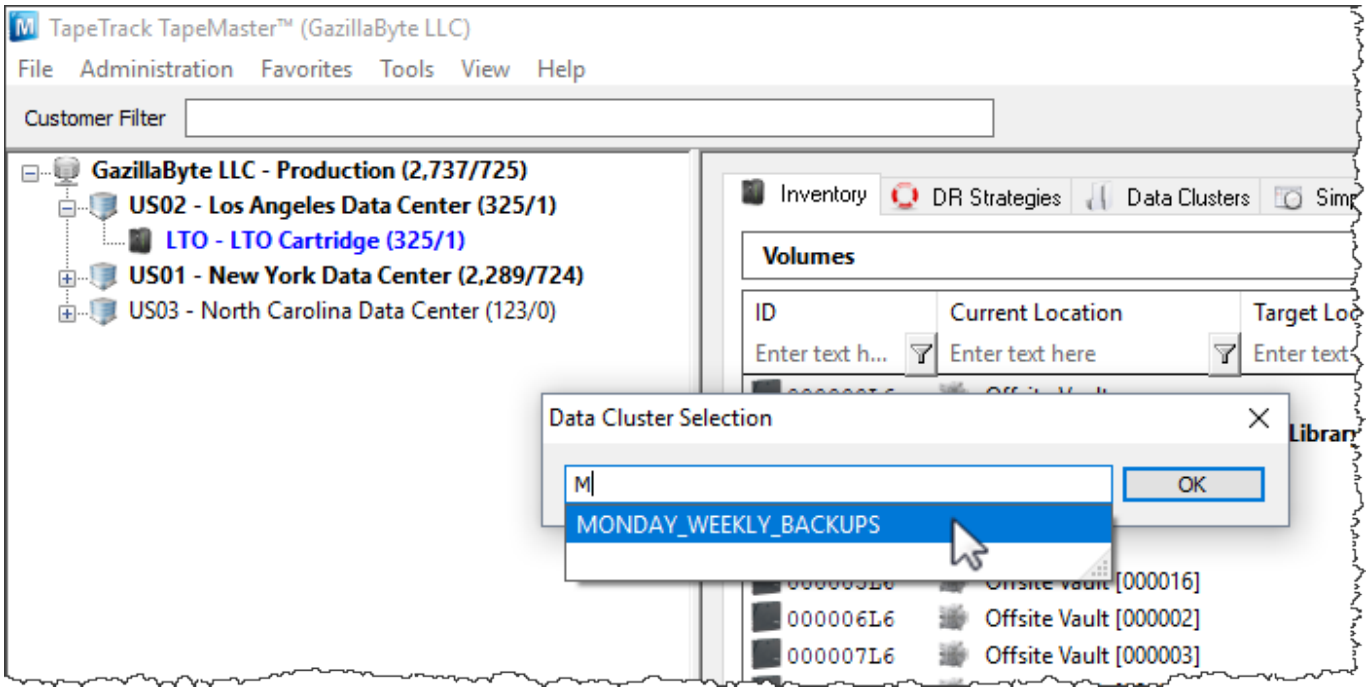

# Add Volumes to the Data Cluster.

## Adding Multiple Volumes

From the Inventory tab of the required Customers media type: Select the Volumes in the Volume List. Right-click, select `Special Operations` → `Modify` → `Data Cluster`.

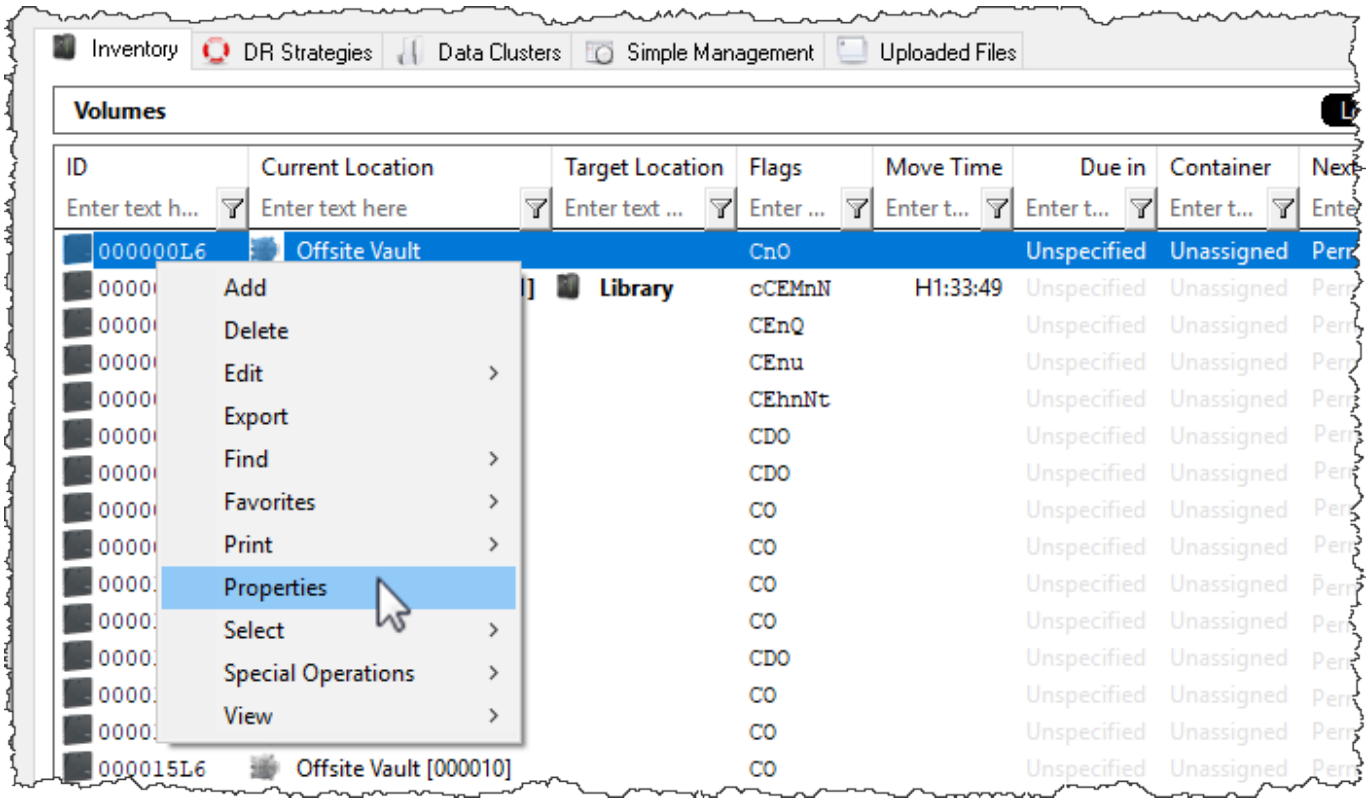

In the Data Cluster Selection window type in the Data Cluster that these Volumes should be associated with, and select from the clusters in the displayed list.

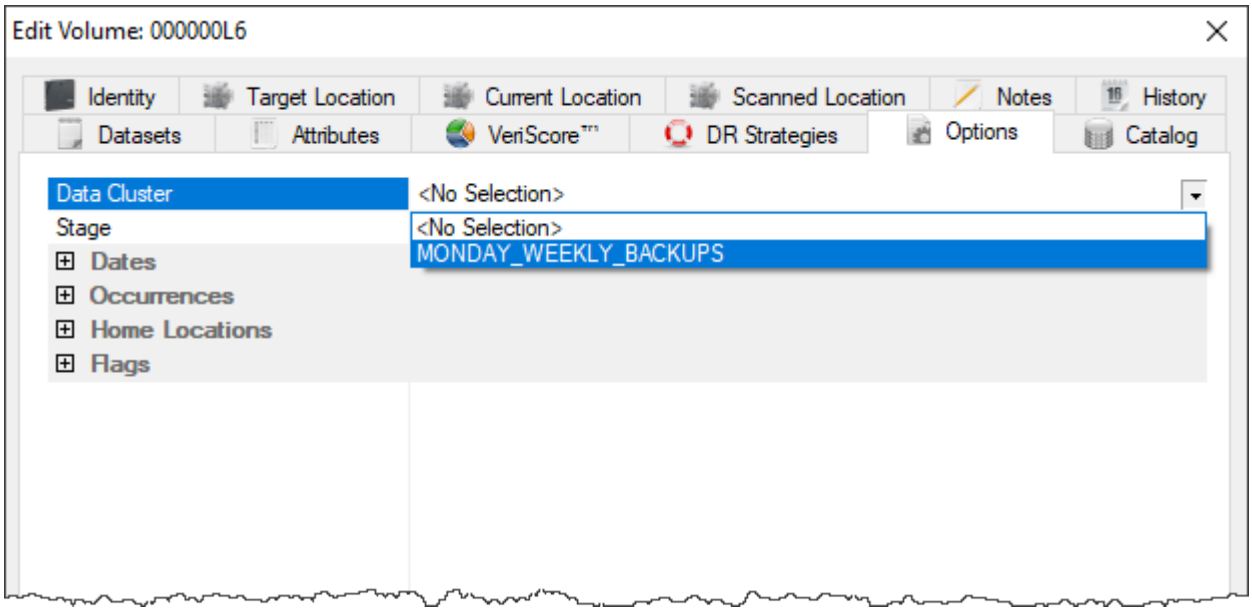

Click OK to save.

## Adding Single Volume

Double-click or Right-Click and select `Properties` on a Volume in the Volume List to launch the Volume Properties Window.

Select the Options tab. At the top will be a field called **Data Cluster** with a drop down menu. Select the Data Cluster to associate this Volume with and click Save.
