

Volume History

Volume history tab displays all historical records attached to a volume including creation, location movements and user interactions.

Historical events for the volume display summary details on the **History** tab.

For each of these events, the date, time type and locations are listed.

Types of historical events include:

- Added - Creation of volume.
- Deleted - Removal of volume.
- Target - New Target location, volume place in a move.
- Scanned-Out - Scanning volume out to record leaving current repository.
- Scanned-In - Scanning in volume to confirm arrival at target repository.
- Date - Adding next move date to volume.

Right clicking on a historical entry, or double clicking, and selecting **Details** will open a **History Details** window. This provides a more verbose listing of the historical entry including:

- **When**
 - Date
 - Time of entry
 - UTC offset
 - Time at source
 - Time zone at source
- **User**
 - User ID

- User Name
- Using
 - IP address of user access
 - TapeTrack interface or software used
 - User operating system
