Media Options : Remove Barcode Suffix

The Media Option `Remove Barcode Suffix` removes the scanned barcode's matching suffix, up to a maximum of three characters.

Options

String pattern, up to 3 characters long, to match against the scanned barcodes.

Examples

With a String pattern of L6 will remove the suffix from barcode 100234L6, to scan as 100234.

With a String pattern of L* will remove the suffix from barcode 100234L4, 100234L6, or any barcde ending in L? (where ? is a wild card to match one character)
