Retain Moving Slot

By default, the Slotting Command Line Program will free up a Slot as soon as a Volume is put in a Move Status to another Repository.

Setting the `Retain Moving Slot` Option for a Repository will ensure that the Slot is not released until the Volume is Confirmed into the new Repository.

`Retain Moving Slot` option is displayed after the option `Enable Slotting` to `True`.

This option can also be set using the Batch Loader key `option_noreslot`.
