

Printing Unqualified Barcode Labels

Printing Unqualified Barcodes with TapeTrack Barcode Printer is accomplished by loading the Barcodes via a text file.

Creating The Barcode Text File

Information in the text file has the format of barcode:text_under_barcode, one barcode per line.

The Barcode Text File can be created several different ways, which method is best used depends on the quantity of Barcode labels required.

If only a couple of labels are required, the easiest method is to use a text editor like Notepad to manually type the labels required.

```
Barcode_Import_File.txt - Notepad
File Edit Format View Help
000000L6;000000L6
000001L6;000001L6
000002L6;000002L6
000003L6;000003L6
000004L6;000004L6
000006L6;000006L6
000007L6;000007L6
Ln 1, Col 1 100% Windows (CRLF) UTF-8
```
