TapeTrack Reconciliation Report

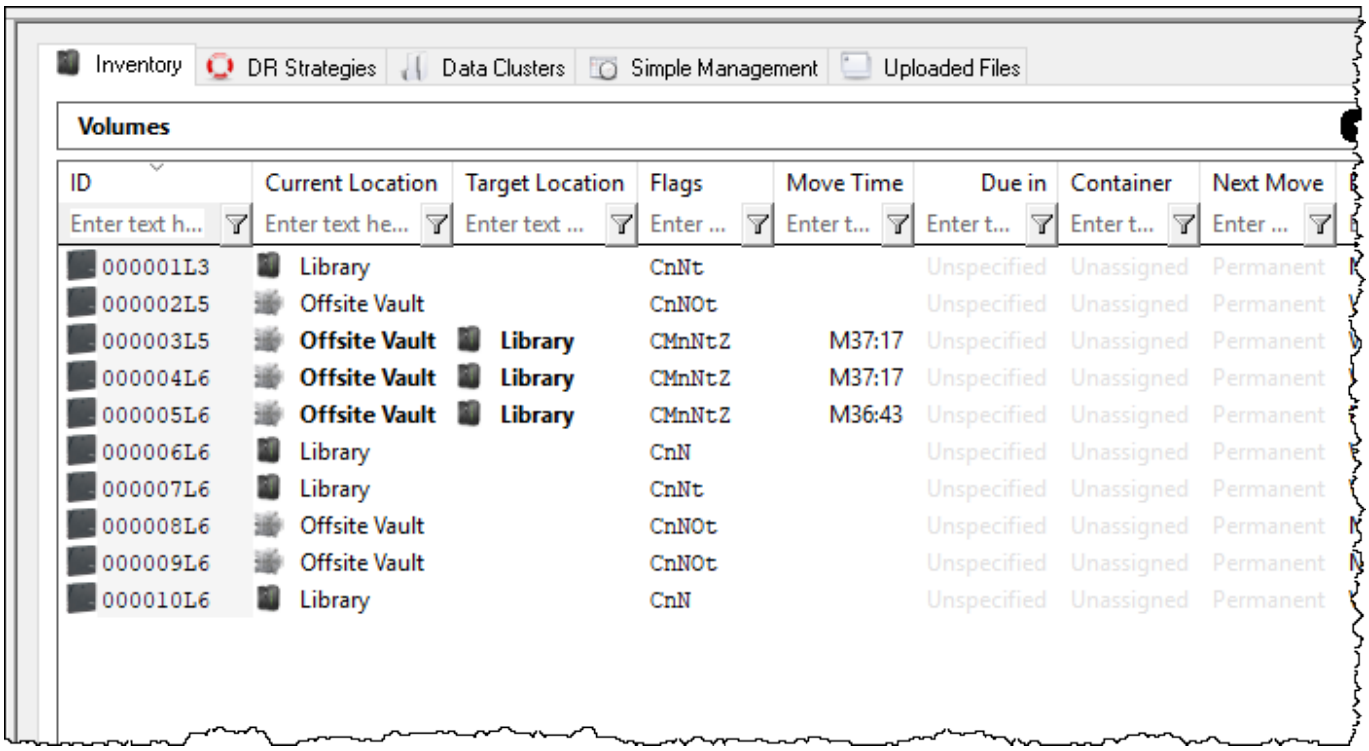

The TapeTrack Reconciliation Report is created by the Command Line Program TMSS10Reconcile.

The program runs in 4 sequential phases:

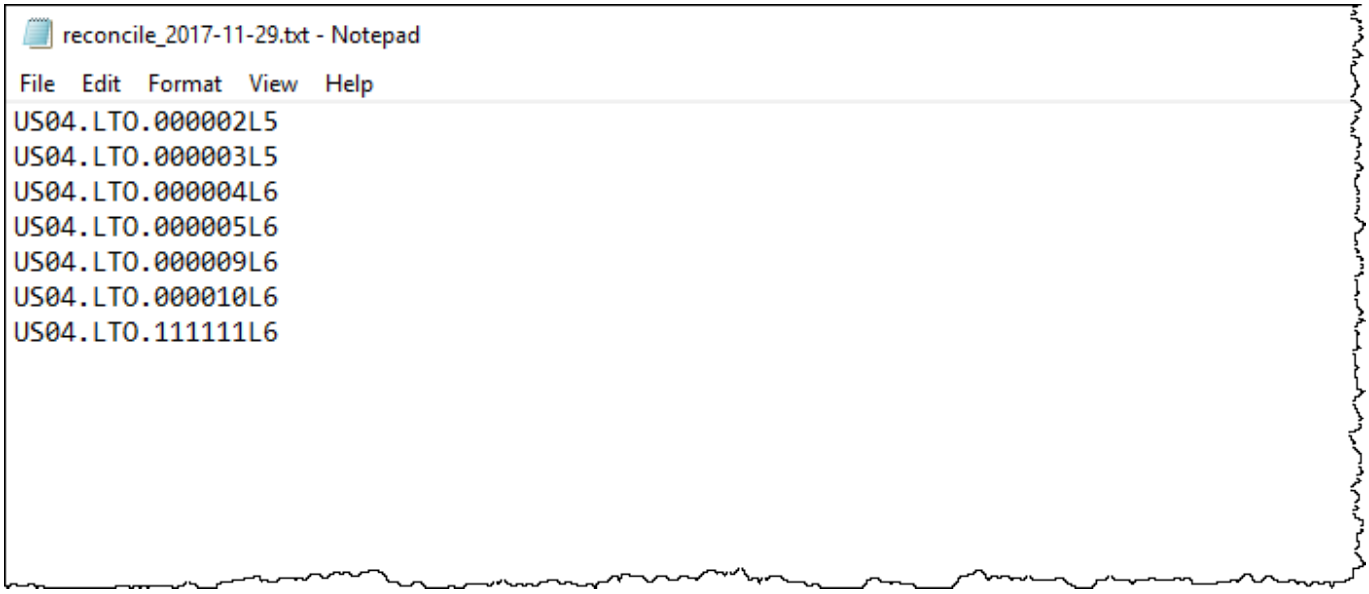

- **Phase 1** Load of the TapeTrack Scan-Map from a Scan File.
- **Phase 2** Reconciliation of the Scan-Map.
- **Phase 3** Listing of unreferenced Scan-Map items.
- **Phase 4** Report Production.

Report Input

TapeTrack Customer Status

Scan File

Report Sections

Load of Scan-Map

The purpose of this phase is load a TapeTrack Scan-File and resolved each of the a Scan-File Entries into a Fully Qualified TapeTrack Barcode.

As the Scan-File is loaded, a Scan-Map is created.

Alternatively, rather than loading the Scan-Map from a Scan-File, the TapeTrack Import Engine can be used to load the Scan-Map. This facilitates loading from Fixed Length Reports, CSV Files and ODBC Data Sources.

The Fully Qualified TapeTrack Barcode can be resolved from an Unqualified Barcode or an Extended Attribute.

```
             System: TapeTrack
 Report Description: Phase 1: Load Scan-Map from Scan-File
    Production Time: Monday, March 19, 2018 - 10:09:27 (AUS Eastern Daylight
Time)
       Report Width: 149 bytes

 Seq.   Record Barcode                                  Resolved As
Status Notes

```

Reconcile of TapeTrack Volumes

The purpose of this phase is to list all of the Volumes that are either in, moving to, or unexpected in the specified Repository.

The following statuses may result:

- **Reconciled** if the Volume is in the target repository, is in the Scan-Map and not moving.
- **Reconciled (Confirmed)** if the Volume is moving into the specified Repository and is in the scan map. The Volume will be Confirmed in the TapeTrack database.
- **Absent from Scan-Map** if the Volume is confirmed into the specified Repository and is not present in the Scan-Map. An Audit Flag will be placed on the Volume.
- **Pending Confirmation** if the Volume is in a Move Status out from the specified repository and is not overdue at the target repository.
- **Overdue at Target** if the Volume is in a Move Status to the specified Repository, is not in the Scan-Map and is now overdue at the target repository.
- **Unexpected in Scan-Map** Present in Scan-Map but not present at, or moving to, the target repository.

Report headings and spacing have been edited to fit information on web formatting

```
            System: TapeTrack
 Report Description: Phase 2: Reconcile TapeTrack Volumes against Scan-Map
       Report Notes: Repository OFFS
    Production Time: Monday, March 19, 2018 - 10:21:34 (AUS Eastern Daylight
Time)
       Report Width: 169 bytes

OK      Pending confirmation
 3  US04.LTO.000004L6  Offsite Vault  Library       H1:10:39  No      Yes
OK      Pending confirmation
```

```
 4  US04.LTO.000005L6  Offsite Vault  Library       H1:10:05  No      Yes
OK      Pending confirmation
 5  US04.LTO.000008L6  Offsite Vault                          No      No
NOT-OK  Absent from Scan-Map
 6  US04.LTO.000009L6  Offsite Vault                          No      Yes
OK      Reconciled
 7  US04.LTO.000010L6  Library                                No      Yes
NOT-OK  Unexpected in Scan-Map
 -- ------------------ -------------- ----------- ----------- ------- ------
- ------  -----------------------
```

Following the example data at the top of page we have:

- Volumes 000002L5 and 000009L6 are referenced as **Reconciled** as they are in the scan map, and confirmed in the current repository (Offsite Vault).
- Volumes 000003L5, 000004L6 and 000005L6 are referenced as **Pending confirmation** as they are in the scan map, and in a move from the current repository but not yet confirmed at the target repository.
- Volume 000008L6 is referenced as **Absent from Scan-Map** as it appears in TapeTrack as at the current repository but is absent from the scan map. This shows the volume is either somewhere it shouldn't be or is missing and as such is given a status of **NOT-OK** and is given an audit flag for further investigation.
- Volume 000010L6 is referenced as **Unexpected in Scan-Map** as it is present in the scan map as being at the current repository but shown in TapeTrack as being confirmed at another repository. As such is given a status of **NOT-OK** and is given an audit flag for further investigation.

Unreferenced Scan-Map Entries

This report shows Volumes that are in the Scan-Map, but are not known to TapeTrack.

```
             System: TapeTrack
 Report Description: Phase 3: Unreferenced Scan-Map entries
    Production Time: Monday, March 19, 2018 - 10:21:34 (AUS Eastern Daylight
Time)
       Report Width: 29 bytes

 Seq.   Barcode
 ------ --------------------
      1 US04.LTO.111111L6
 ------ --------------------
```

Reasons for this error could be:

- Volume does not belong to you but has been included with your volumes by operator error.
- Manually produced scan file with a typo on a volume ID.
- Volume added to inventory but not entered into TapeTrack.

Reconciliation Statistics

This report shows the final statistics for the Reconciliation process.

```
            System: TapeTrack
 Report Description: Phase 4: Reconciliation Statistics
    Production Time: Monday, March 19, 2018 - 10:21:34 (AUS Eastern Daylight
Time)
       Report Width: 75 bytes

 Metric                                                          Count
 ------------------------------------------------------------ ------------
 Phase 1: Read from Scan-File                                         7
 Phase 1: Loaded successfully from Scan-File                          7
 Phase 1: Loaded unsuccessfully from Scan-File                      + 0
 ------------------------------------------------------------ ------------
 Phase 2: Reconciled                                                  2
 Phase 2: Reconciled (Confirmed)                                      0
 Phase 2: Confirmation Bypass                                         0
 Phase 2: Pending confirmation                                        3
 Phase 2: Out of scope                                                3
 Phase 2: Absent from Scan-Map                                      + 1
 Phase 2: Unexpected in Scan-Map                                    + 1
 Phase 2: Overdue at subject repository                             + 0
 Phase 2: Overdue at target repository                              + 0
 ------------------------------------------------------------ ------------
 Phase 3: Unreferenced Scan-Map items                               + 1
 ------------------------------------------------------------ ------------
 Phase 4: Total Errors                                                3
 ------------------------------------------------------------ ------------
```

Phase 1 Reads in volume ID's from the scan file, parses them (depending on format) into Customer ID, Media ID and volume ID. Metrics are then displayed as the number of volumes successfully and unsuccessfully loaded ready for reconciliation in phase two.

Phase 2

Movement Aging Report

This report shows statistics on Volumes that remain in a Move Status after the Reconciliation has completed.

```
            System: TapeTrack
 Report Description: Phase 4: Movement Aging Report
    Production Time: Monday, March 19, 2018 - 10:21:34 (AUS Eastern Daylight
Time)
       Report Width: 40 bytes

 Duration             Incoming Outgoing
```

```
-------------------- -------- --------
less than 1 day             0        3
less than 2 days            0        0
less than 3 days            0        0
less than 4 days            0        0
less than 5 days            0        0
less than 6 days            0        0
less than 7 days            0        0
less than 8 days            0        0
less than 9 days            0        0
9 or more days              0        0
-------------------- -------- --------
```
