Advanced Administration

In addition to the administration functions outlined in the Basic Administration section, those responsible for the administration of a TapeTrack Framework Server may also want to understand the following administration tasks:

1. Enabling Replication.
2. Changing the default port.
3. Logging
4. Changing the default database directory.
5. Copying or Moving the database directory to another machine.
6. Reloading the database.
7. Using the Server Helper Application.
