Changing the Database Location

The TapeTrack database location can be changed by specifying the `-h argument` when starting TapeTrack.

It is recommended that the TapeTrack database not be stored on an SMB or NFS share.

Changing the Database Location On Windows

Open administrative command window and stop the TapeTrack service with the command **net stop TMSS10SVC**.

Open regedit and navigate to **HKEY_LOCAL_MACHINE\SYSTEM\ControlSet001\Services\TMSS10SVC**.

Double click on ImagePath to open Edit String window.

Add argument **–h** to end of current string and fully qualified path of db folder.

Click OK and exit out of registry.

In the administrative command window restart the TapeTrack service with the **net start TMSS10SVC**.

Login to TapeMaster to check the database redirection was successful.
