Linux File Structure

Framework Server

The TapeTrack Framework Server RPM will install files to the following locations:

1. `/var/tapetrack` TapeTrack database files.
2. `/usr/bin` TapeTrack Command Line binaries
3. `/usr/sbin` TapeTrack daemon binary
4. `/etc/tapetrack` TapeTrack config files

Once the install is complete, only the `/var/tapetrack` directory should be expected to grow.

When configuring a new Linux install, the default partition layout should suffice.

Server Utilities

The TapeTrack Framework Server Utilities RPM will install files to the following directories:

1. `/usr/bin` TapeTrack Command Line binaries
2. `/usr/lib/tapetrack/lib32` TapeTrack shared libraries
