

Installing Linux x86

Prerequisites

Redhat based Linux operating system:

- RedHat
- CentOS
- Fedora
- Oracle Linux
- ClearOS

Linux dependency libraries:

- glibc.i68
- zlib.i686
- libstdc++.i686

Download and Install Linux rpm's -TapeTrack Framework Server

The two installation packages required for TapeTrack Server - Linux are:

[Client RPM Package](#)

[Server RPM Package](#)

Always install the Client RPM package first as the Server RPM package depends on files located within the Client RPM package.

An example installation command is:

Install the Client RPM package.

```
<sxh> rpm -i http://mirror-us.tapetrack.com/Linux-x86/tapetrack-clients-latest.i386.rpm </sxh>
```

Install the Server RPM package.

```
<sxh> rpm -i http://mirror-us.tapetrack.com/Linux-x86/tapetrack-server-latest.i386.rpm </sxh>
```
