Installing

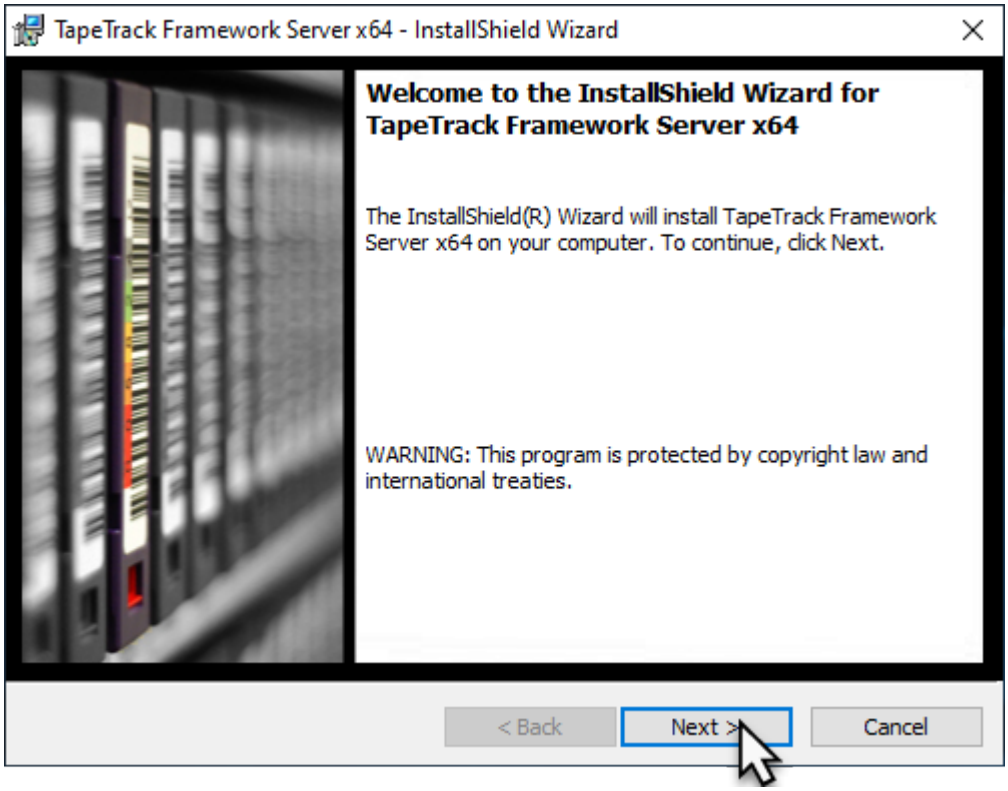

Windows

The TapeTrack Framework Server Software installs automatically via an InstallShield installer.

Locate the executable you downloaded, setup.exe, and double click to initiate the installation.

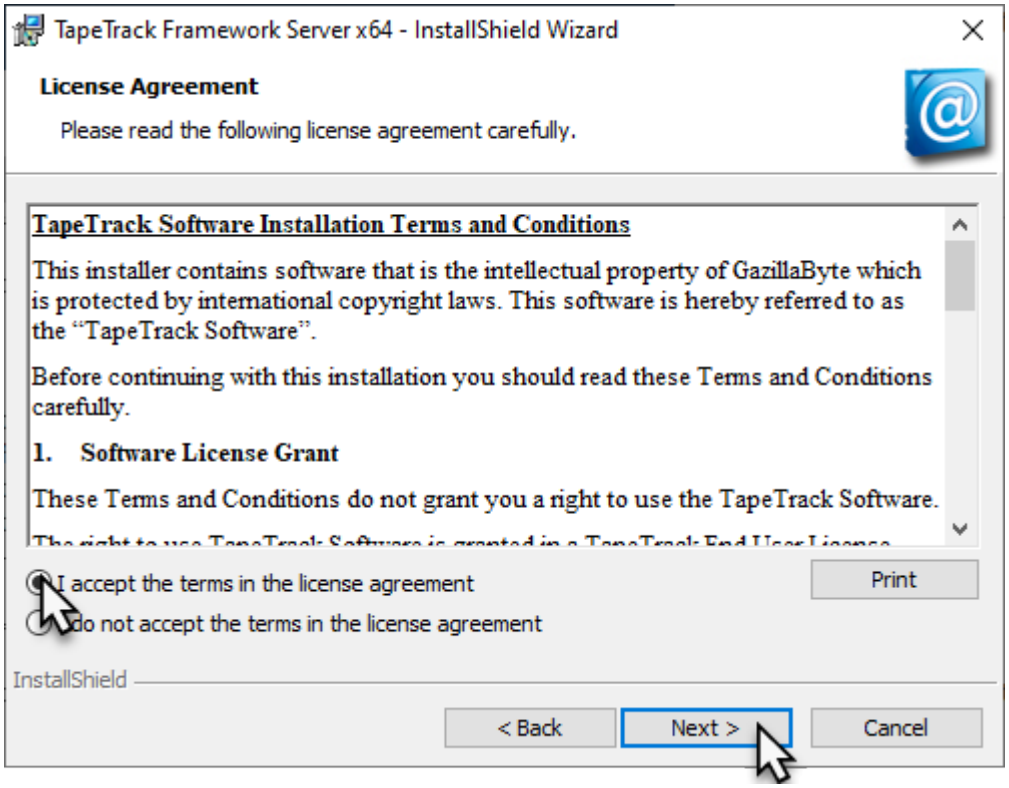

Click `Next >` to start the Install Shield Wizard.

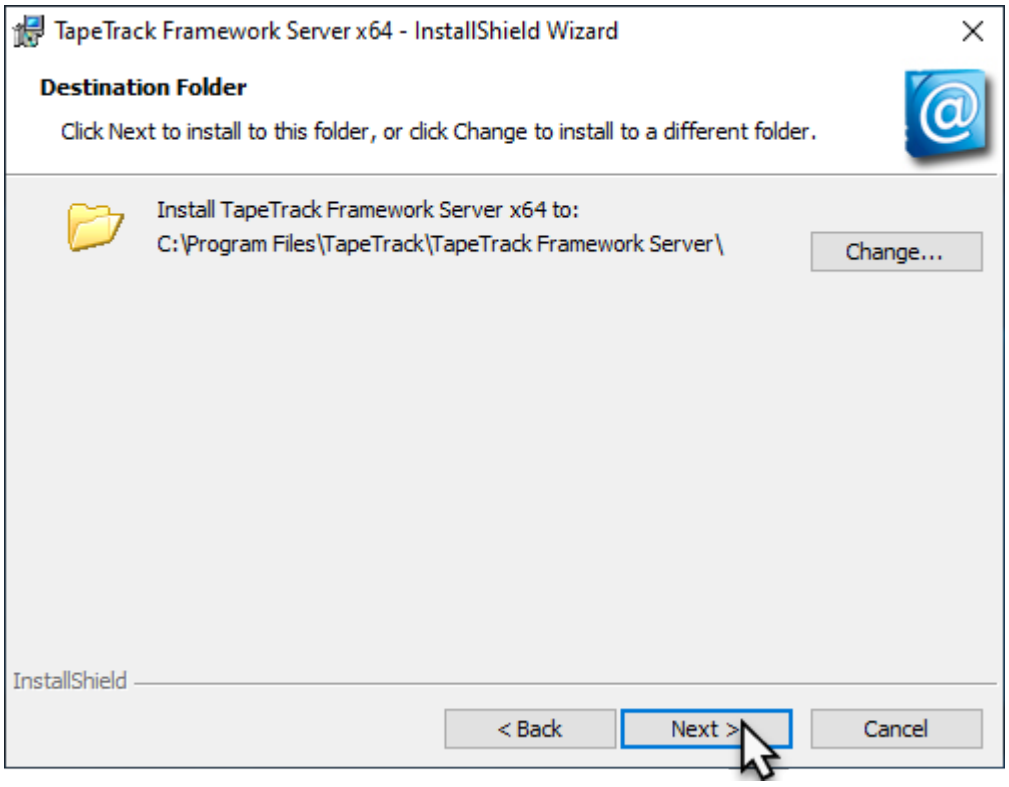

After reading and agreeing to the License Agreement click `I accept the terms in the`

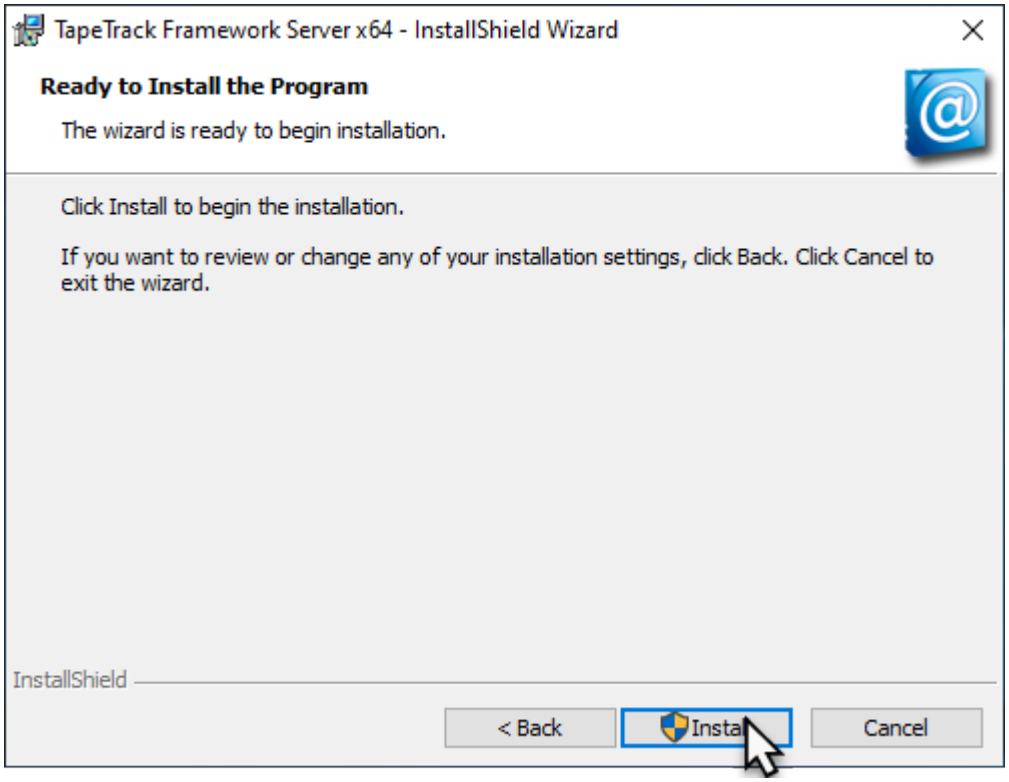

`license agreement` and `Next >` to proceed

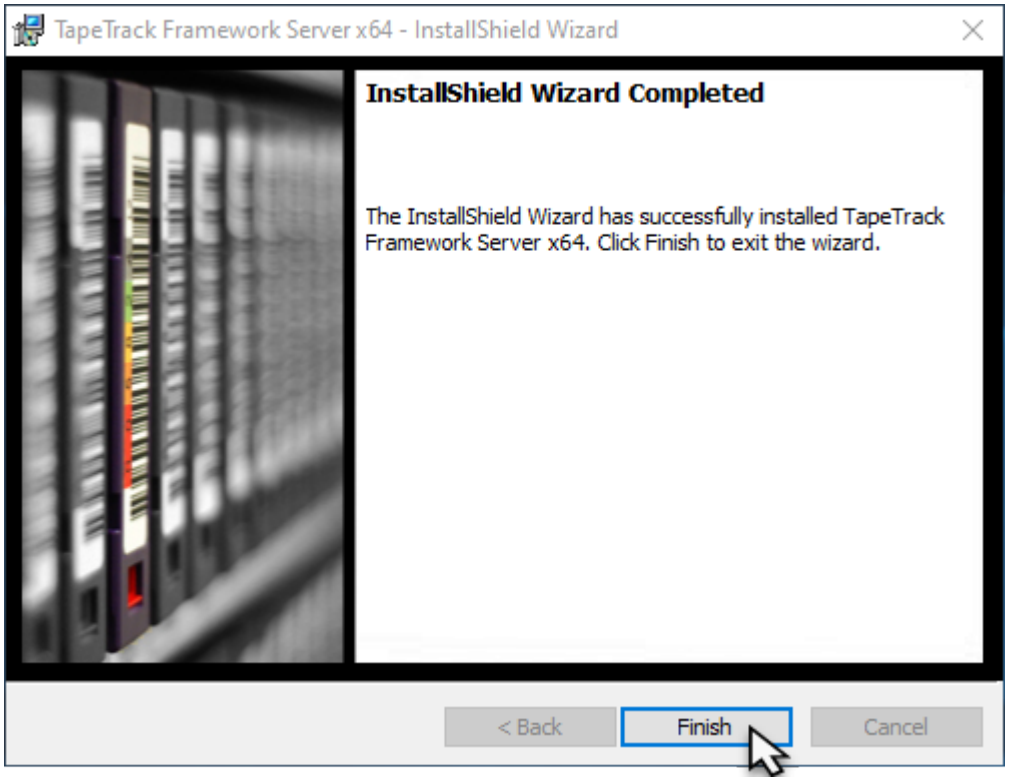

Confirm the installation directory is correct,
or click `Change` to select another installation directory. Click `Next >` to proceed.

Click `Install` to begin the installation

Click `Finish` to exit the installer.

At the conclusion of the installation process, the installer will also kick-off an install of the following packages, which can optionally be installed:

1. TapeTrack TapeMaster
2. TapeTrack Server Utilities

Linux

The TapeTrack Framework Server will be installed by the Redhat Package Manager (RPM).

An example installation command is:

Install the Client package (must be installed before the Server package).

```
rpm -i
https://mirror-us.tapetrack.com/Linux-i686/tapetrack-clients-latest.i386.rpm
```

Install the Server package.

```
rpm -i
https://mirror-us.tapetrack.com/Linux-i686/tapetrack-server-latest.i386.rpm
```
