System Requirements

Prerequisite Software

There is no pre-requisite software required to install and run the TapeTrack Server software. You may, however, consider using the following options:

- An enterprise scheduler to submit and track TapeTrack batch tasks.
- The Apache Web Server (Version 2 or above) to implement the TapeTrack iCalendar component.
- A distributed backup agent to backup the TapeTrack Database

Minimal Requirements

The requirements for the TapeTrack Framework Server are minimal, but the following minimum configuration is recommended:

- Windows 2008 Server (or above)
- 8GB of RAM
- 500MB of additional storage
- Gigabyte Ethernet

Virtualization Support

TapeTrack Framework Server runs without issue in a virtualization environment and is regularly deployed under:

- VMWare ESX.
- Windows Hyper-V.
- Xen.
