SetPermanentExpiryDateValue

Set the date that is to be considered as permanent.

Phase

This instruction is used by the TapeTrack Synchronization Engine.

Syntax

SetPermanentExpiryDateValue (*date*);

string *date;*

date	The date that should be considered permanent.

Example

Set the permanent date to 1971-01-01

```
#
# Extract the EXPIRYDATE from offset 10, length 10 of the report body.
Extract(EXPIRYDATE, 10, 10, 0);

# Set the EXPIRYDATE format.
SeExpiryDateFormat("%%d/%%m/%%Y");

# Translate the EXPIRYDATE date to 1971-01-01.
AddTranslation(EXPIRYDATE, "PERMANENT", "01-01-1971")

# Set the permanent date to 1971-01-01.
SetPermanentExpiryDateValue ("1971-01-01");
```
