

# Add TapeTrack Sync And Utilities To Linux

These instructions are based on installing Linux Intel 32 Bit on Fedora. If installing on other Linux systems please make any adjustments required.

## Downloading RPM

Instructions to download RPM use wget, if required install wget

```
yum install wget
```

Download latest RPM's from <http://mirror-us.tapetrack.com/Linux-x86/>  
(other Linux installations are available at <http://mirror-us.tapetrack.com/>)

## Example

```
wget  
http://mirror-us.tapetrack.com/Linux-x86/tapetrack-clients-2021.3-1.i686.rpm  
wget  
http://mirror-us.tapetrack.com/Linux-x86/tapetrack-server-2021.3-1.i686.rpm
```

## Install Dependencies

While you may have some of these dependencies installed trying to install them again will only let you know they already exist.

Dependencies required:

- glibc\*.i686
- zlib.i686
- libssh.so.\*
- libcurl.so.4
- libstdc++-devel.i686

## Example

```
yum install glibc*.i686
```

## Install RPM

Install tapetrack-clients-2021.3-1.i686.rpm

```
rpm -i tapetrack-clients-2021.3-1.i686.rpm
```
