Cannot update slot to zero

If a Volume is moving to a Repository that has Slotting enabled, before the Volume can be Confirmed, the Volume must have a Slot assigned.

If the Slot is zero at the time the Volume is being confirmed, the following message will be displayed:

This error message may occur if a product like TapeTrack Checkpoint is working with a cache of Volume information that was loaded before Slot Allocation was run.

technote, slot, slotting, tapemaster slot, update-doco
