

Cannot update slot to zero

If a [Volume](#) is moving to a [Repository](#) that has [Slotting](#) enabled, before the [Volume](#) can be [Confirmed](#), the [Volume](#) must have a Slot assigned.

If the [Slot](#) is zero at the time the [Volume](#) is being confirmed, the following message will be displayed:

This error message may occur if a product like TapeTrack Checkpoint is working with a cache of [Volume](#) information that was loaded before [Slot Allocation](#) was run.

[technote](#), [slot](#), [slotting](#), [tapemaster slot](#), [update-doco](#)
