Remove Slot Level Display In TapeMaster

Modify the TapeMaster Configuration File

Locate the TapeMaster Configuration file (default location C:\Program Files\TapeTrack\TapeTrack TapeMaster\TMSSMaster.cfg) and open with Notepad or other plain text editor.

Locate the section **variables**

Remove comment tags /* & */ from above and below variables.

Change the line of code
TMSSLEVELNAMES = “A,B,C”;
to
TMSSNOLEVELSLOT = “true”;

TMSSMaster.cfg - Notepad

File Edit Format View Help

```
options = {
   //
   // When exporting data to email send to the following addresses
   //
   email = [ "emailto1@tapetrack.com", "emailto2@tapetrack.com" ];

   variables = {
       TMSSNOLEVELSLOT = "true";
   };

   showparent = true;
};

defaults = {
```

and save file.

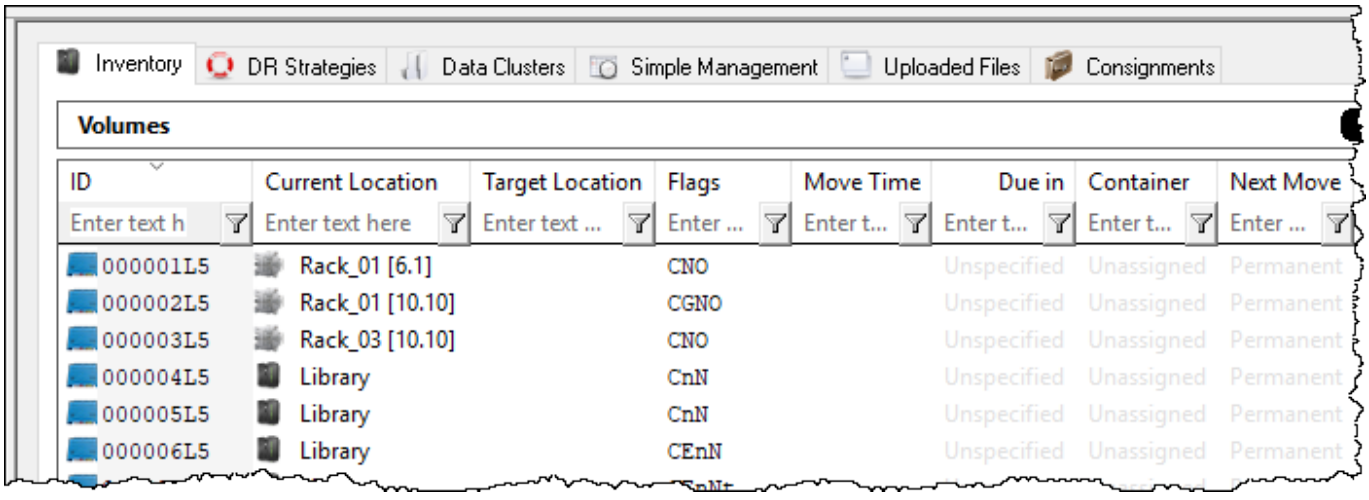

Make sure that you have sufficient rights to save file to directory and to save as TMSS10Master.cfg and not as a text file or other file extension.

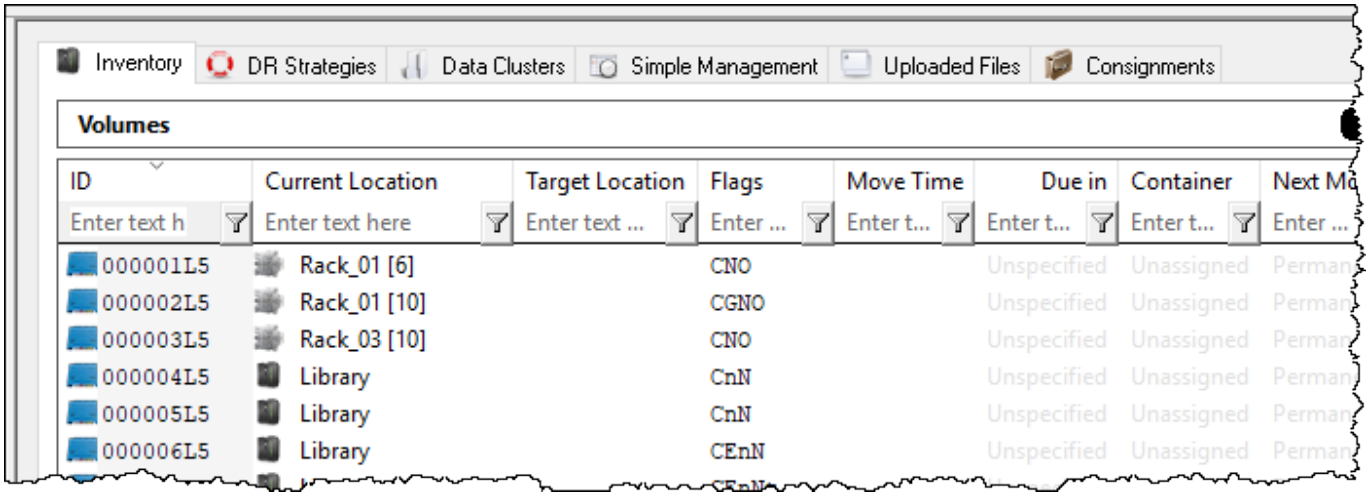

To check the modification was successful:

Login to TapeMaster and open slotted media to check display of volume location is now restricted to Zone and shelf as illustrated by the images below.

Before modification - TapeMaster displaying Zone, shelf and slot.

After modification - TapeMaster displaying Zone and shelf only.

If when opening TapeTrack TapeMaster you receive an error - **Failed to read configuration file (TMSSMaster.cfg): Line( ) - Syntax error** check the configuration file that you have used plain ASCII quotes (“ ”) and not rich text quotes (“ ”) and that the replaced text is correct.
