

Hiding Media Types

Media Types can be hidden, or removed from view, in TapeMaster, cleaning up the Customer Tree display without needing to delete old or unused Media-ID's and their associated data.

Hiding Media Types is a two part process:

- Setting the required Media's Hide Media Option to True.
- Removing the Hidden Media Type from display via the TapeMaster Preferences.

Media Properties Options

To hide a Media Type, expand the Customer in the Customer Tree, right click on the required Media Type and select Properties.

The screenshot shows the TapeTrack TapeMaster™ (GazillaByte) application window. The left pane displays the Customer Tree with the following structure:

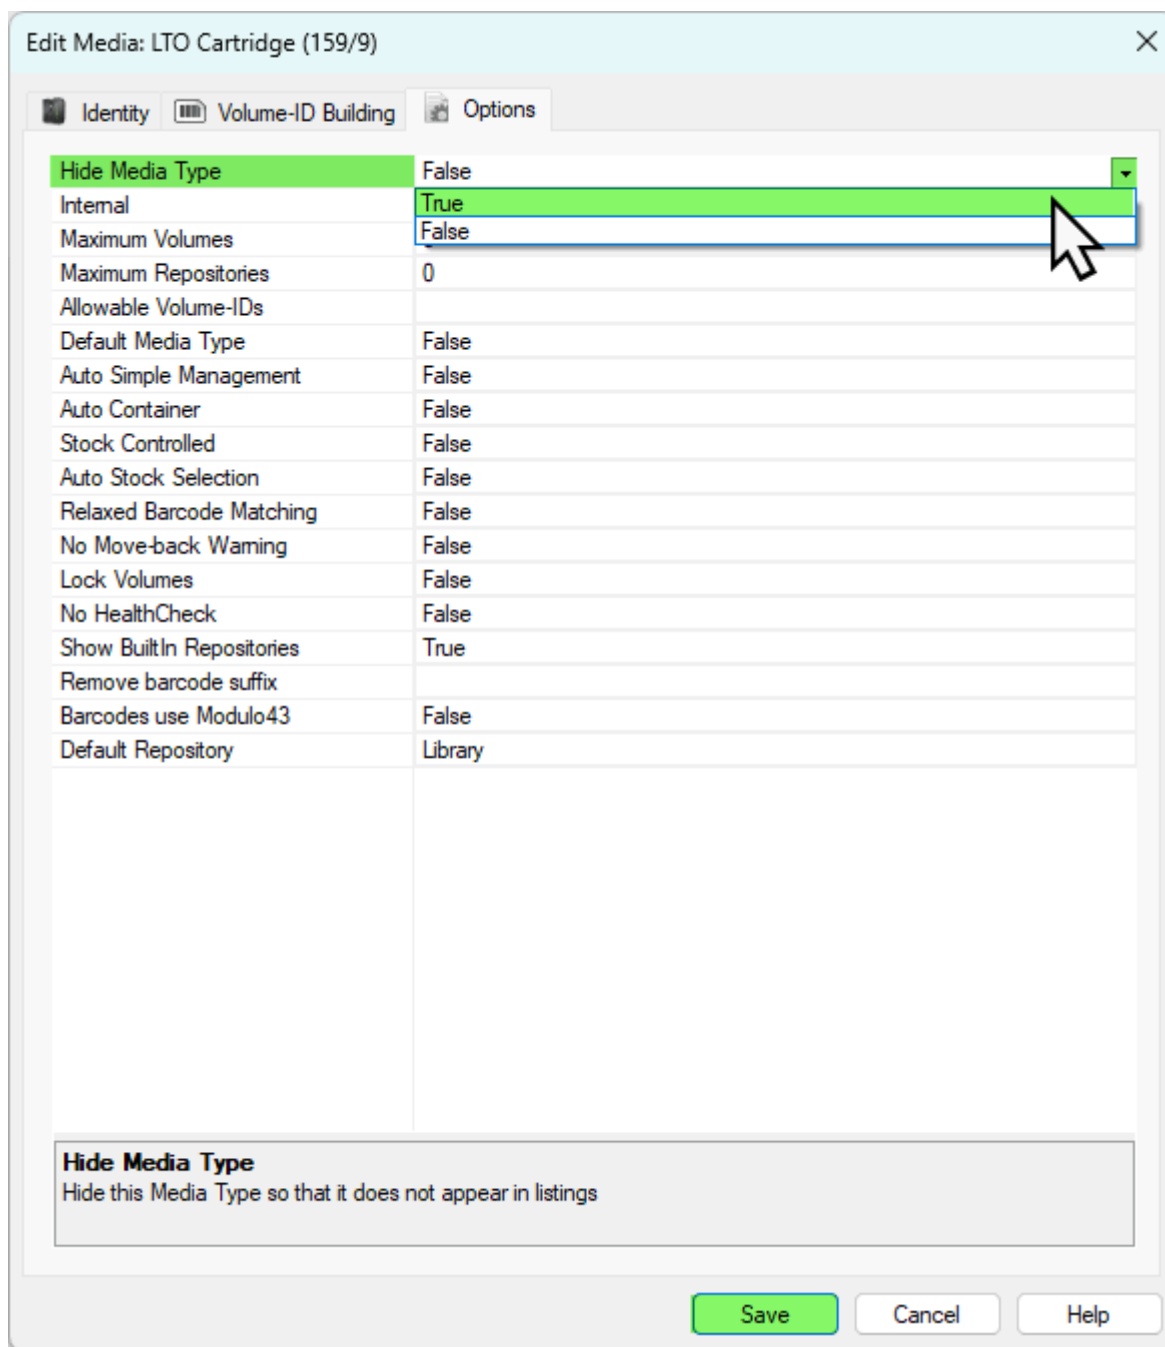

- GazillaByte - Production
 - US00 - United States
 - US01 - New York
 - US02 - Los Angeles
 - CONT - Contain
 - LTO - LTO Cartridge
 - US03 - North Carolina

The main pane displays the Volumes table for the Los Angeles Data Center LTO Cartridge. The table has the following columns: ID, Current Location, Target Location, Next Move, and Description. The table contains 23 rows of data, showing various media IDs and their locations (Library or Offsite Vault).

ID	Current Location	Target Location	Next Move	Description
000006L6	Library	Offsite Vault ...	Friday, Nov...	Monthly
000008L6	Library	Offsite Vault ...	Friday, July ...	Weekly
000010L6	Library		Thursday, J...	Scratch
000011L6	Offsite Vault [...]		Monday, Jul...	Weekly
000012L6	Library		Permanent	Scratch
000013L6	Library		Permanent	Scratch
000014L6	Library	Offsite Vault ...	Tuesday, Jul...	Weekly
000015L6	Library		Permanent	Scratch
000016L6	Library		Permanent	Scratch
000017L6	Library		Permanent	Scratch
000018L6	Library		Permanent	
000019L6	Library		Permanent	
000020L6	Library	Offsite Vault ...	Friday, Dece...	Weekly
000021L6	Library		Permanent	
000022L6	Library		Permanent	
000023L6	Library		Permanent	

The bottom of the main pane shows the Repositories section with icons for Gemtrac and Library. The status bar at the bottom indicates: Connection 127.0.0.1 uses AES 256 bit encryption.

Set the Hide Media to True and click Save to update data.

Identity	Volume-ID Building	Options
Hide Media Type False		
Internal True		
Maximum Volumes False		
Maximum Repositories 0		
Allowable Volume-IDs

Display Or Hide Media Type From Customer Tree

Depending on TapeMaster Preferences, the Hidden Media Type can be set to either be greyed out and inactive (not clickable) or completely removed from display. Having the Hidden Media Type greyed out is the default installation setting, how your display functions will depend on what you have the preferences set.

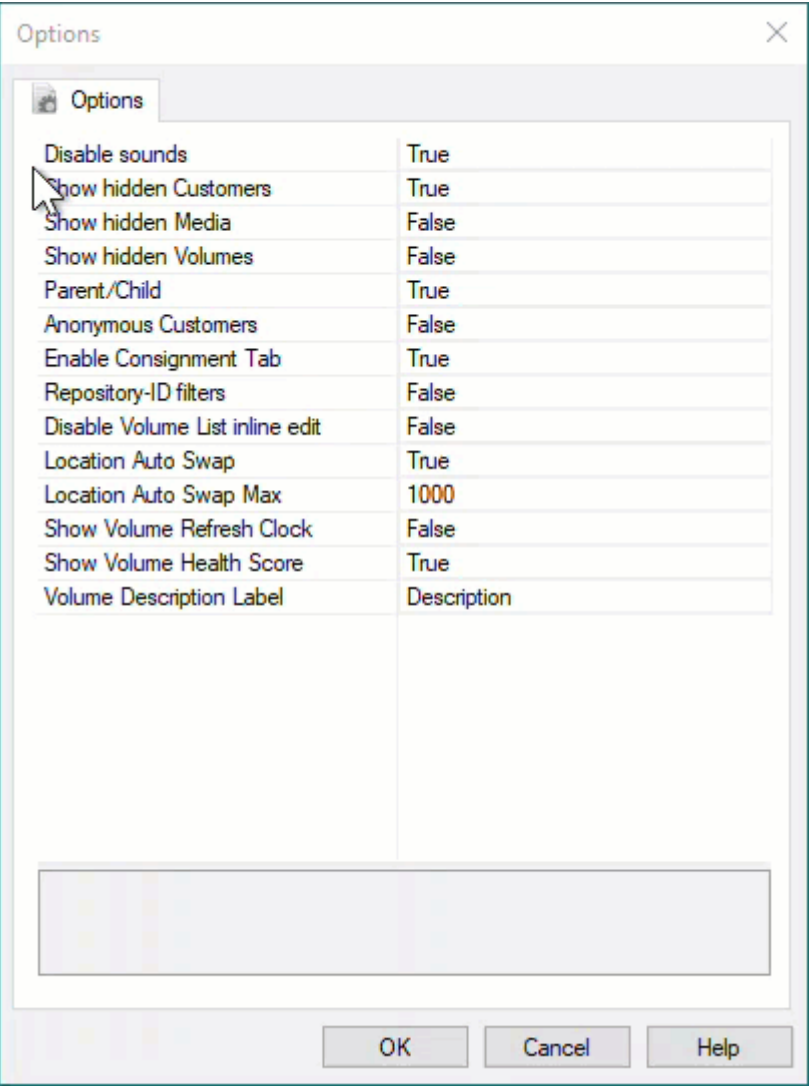

Hidden Media Type Greyed Out

To have the hidden Media Type displayed in a greyed out format, from the main menu, click File >

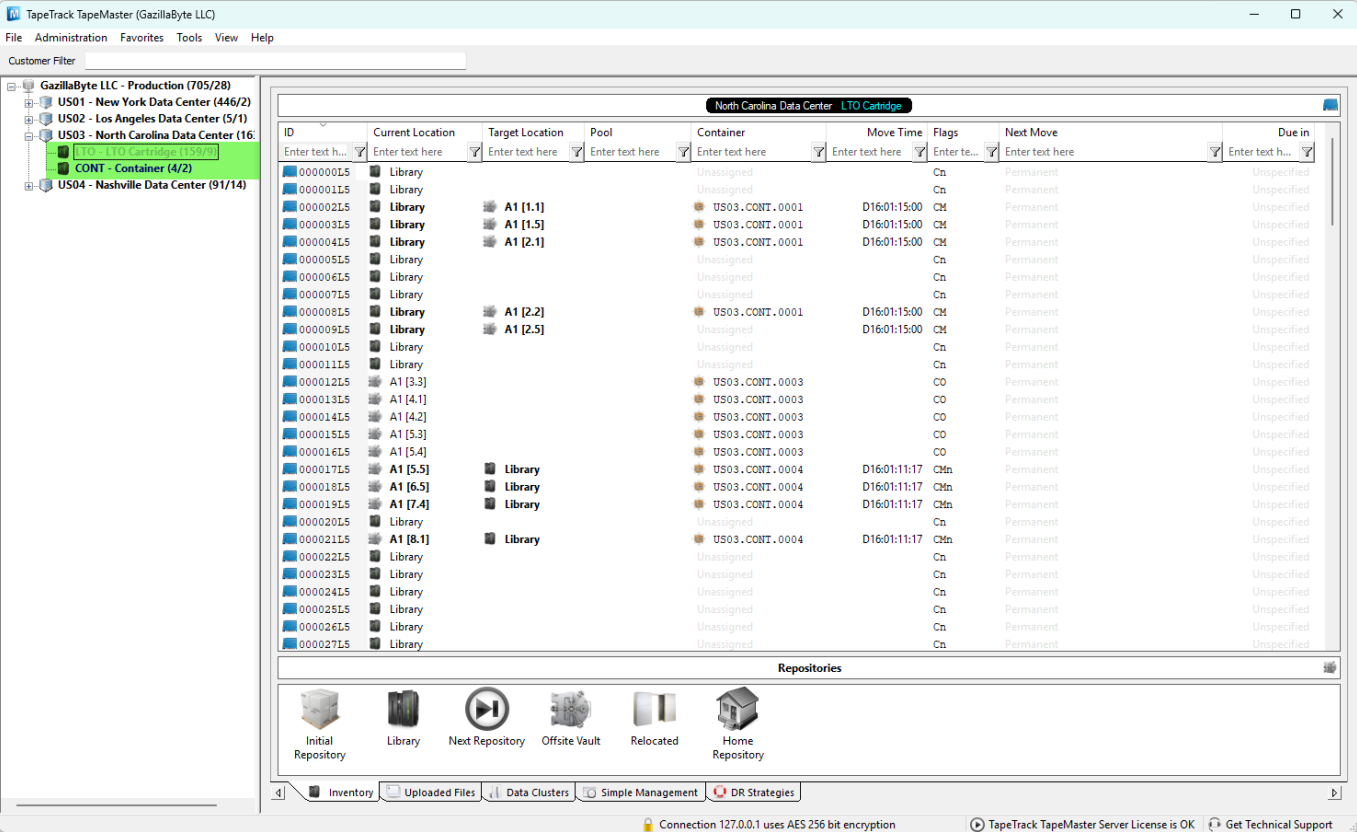

Preferences

In the options window, set Show Hidden Media to True and click OK to update data.

The selected Media Type will now display in the Customer Tree as a greyed out entry.

Hidden Media Type Removed From Display

To have the hidden Media Type removed from display, from the main menu, click **File > Preferences**

In the options window, set **Show Hidden Media** to **False** and click **OK** to update data.

The selected Media Type will no longer display in the Customer Tree.

Unhiding Media Types
