

Installing TapeTrack Via Repository

Tapetrack

Prerequisites

Redhat based Linux operating system:

- RedHat
- CentOS
- Fedora
- Oracle Linux
- ClearOS

dnf-plugins-core

Add TapeTrack Repository

Create file for repository /etc/yum.repos.d/tapetrack.repo.

```
cat > /etc/yum.repos.d/tapetrack.repo <<'EOF'
[tapetrack]
name=Tapetrack Repository
baseurl=https://mirror-us.tapetrack.com/
enabled=1
gpgcheck=0
repo_gpgcheck=0
metadata_expire=300
EOF
```

Set permissions

```
<code> chmod 644 /etc/yum.repos.d/tapetrack.repo </code>
```
