Technote: Creating Reports

TapeTrack can produce reports two ways, through Desktop and Command Line programs.

Desktop Programs

Reports can be created through the Desktop programs by selecting and filtering data and then exporting to a report.

This allows a quick and efficient creation of reports on demand.

Reports based over multiple Customer-ID's or Media-ID's can be produced through the Volume Global View function, of which results can be filtered down to required data and then exported to file.

When reporting on individual Media-ID's, the reports from the inventory window provide far more extensive options

Command Line Programs

Reports that are required on a regular basis can be created using various command line programs that can then be saved to file, emailed and/or uploaded to the TapeTrack Server allowing clients to download without the need to create the reports themselves.

Report Output

Both the Desktop and Command L Programs can produce reports in the following formats:

- Text
- HTML
- PDF
- CSV

Command Line Reports

Report	Description
Inventory Report	Lists all Volumes in inventory that matches the supplied filters
Move List	
Users List	
Repositories	Listing of all Repositories including capacity, usage, and number of moving Volumes
Zones	Format 1: Lists current zones, assigned Customer-ID, occupying Media type and Volume ID by slot number

Report	Description
	Format 2: Lists current zones, assigned Customer-ID, occupying Media type, assigned Repository-ID and Zone description
