Re-slotting Volumes Within The Same Repository

Select Volumes to Re-slot

If you are going to use a scanner to physically scan the Volumes into the new Slots there is no need to select the Volumes in TapeMaster so you can skip this step.

Select Volumes from the inventory window that require re-slotting using Shift+Click and/or Ctrl+Click.

Copy the Volume-ID's to the clipboard by right clicking highlighted Volumes and selecting `Edit` > `Copy` > `Unqualified Volumes`

Open Repository Map

Right click the required Repository and select `View Repository Usage Map` to open the Slot allocation window.

Select Slots

Automatically Selected Slots

Manually Selected Slots

Scroll through the listing of Slots and select the required Slots using Shift+Click and/or Ctrl+Click until the correct number of slots are selected for the number of Volumes to be assigned.

Assign Volumes To Slots

If your Volume-ID's are copied to your clipboard, right click the highlighted Slots and select `Edit` > `Paste Volume List Into Slots`.

If you are using a scanner to scan each Volume to a Slot, right click the highlighted Slots and select `Scan` > `Scan To Assign` to open the Scan window. Scan the tape to assign each Volume to a selected Slot.

Confirming Volumes Into Slots

Block Slots If Not To Be Re-used

Update TapeMaster Display
