# Technical Note: Framework Server Command Line Arguments

The following command line arguments can be passed to the Framework Server executable:

| Argument | Type | Notes |
|---|---|---|
| -f | bool | Run the program in foreground more (Windows only) |
| -h | string | Path to the directory containing the TapeTrack database |
| -l | integer | Log file format (0=append, 1=truncate, 2=timestamp, 3=stdout/stderr) |
| -L | bool | Reload the database |
| -p | integer/string | Port that TapeTrack will listen on. If string, the services file will be checked |
| -S | string | Syslogd host in format host:port (default localhost:514) |
| -r | bool | Allow a one time login to the 'tapemaster' User-ID with a blank password |
| -X | bool | Disable the replication sub-system |
| -V | bool | Print version and exit |
| -? | bool | Show help text |
