Technical Note: Server Installer Variables

When the Windows version of the TapeTrack Server is installed a number of variables are created by the installer. These variables are used in the example scripts that are installed and can be used in user written scripts.

Variable	Description
TMSS10DB	The path to the TapeTrack Database directory.
TMSS10BACK	The path to the TapeTrack backup directory.
TMSS10REPOSTS	The path to the TapeTrack Reports directory.
