Setting Environmental Variables

The default behaviour of TapeTrack programs can be changed by setting environmental variables.

These variables can be set using the following methods.

Windows Command Line

<sxh plain;> C:\Users\gnicol.GAZILLABYTE>help set Displays, sets, or removes cmd.exe environment variables.

SET [variable=[string]]

```
variable  Specifies the environment-variable name.
string    Specifies a series of characters to assign to the variable.
```

</sxh>

Linux Shell

TapeTrack Config File
