Technical Note: Slot Numbering

When a volume has a slot in TapeTrack, the slot is represented by both a Virtual and Physical Slot.

When displaying Physical Slot, the slot will either be displayed as a slot, or a level and a slot (when the Zone the slot belongs to has defined slots per level).

It is possible to change the way a Physical Slot is displayed in TapeTrack Client and TapeTrack Batch programs by defining changes in the Configuration File.

Changing Physical Slot Representation

Masking the Slot

Changing the Level
