

Upgrading Checkpoint

Upgrading Checkpoint is a simple process that maintains your server connection and user details during the uninstallation of your current version and installation of the new release.

Download Installer

- [Lite 64 Bit](#)
- [Lite 32 Bit](#)

Remove Current Installation

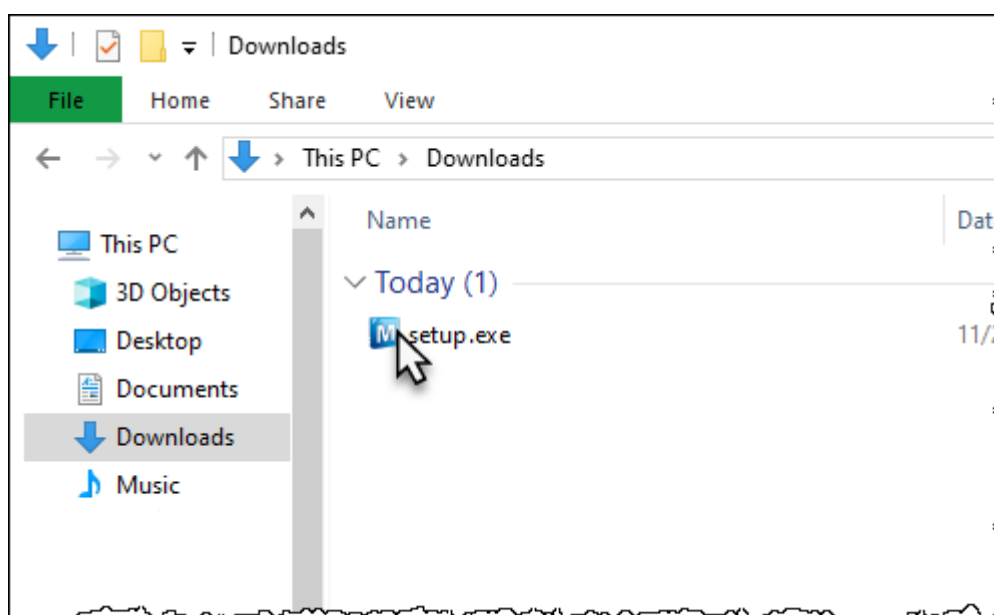

The following instructions are the suggested method for Windows 10.

If you are running another operating system, please follow the instructions for that system.

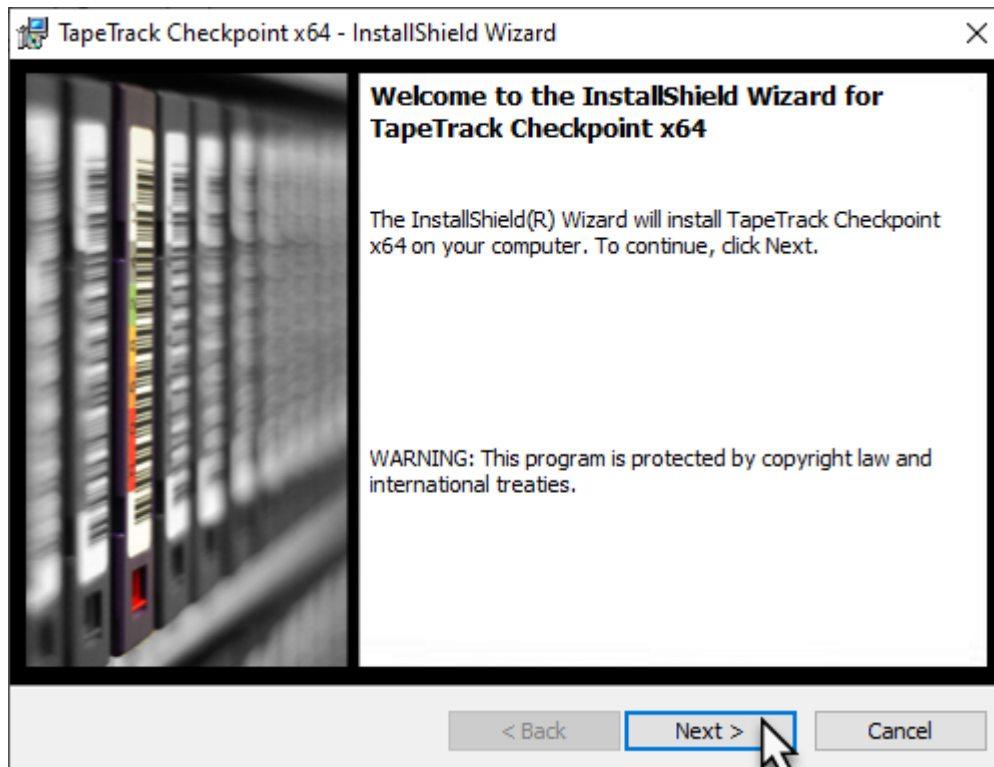

- Open the Start menu.
- Click Settings (Gear icon).
- Click System on the Settings menu.
- Select Apps & features from the left pane to display a list of all installed apps.
- Select Checkpoint from the list by left clicking.
- Click the Uninstall button that appears.
- Click the Uninstall pop-up button to confirm.

Install New Release

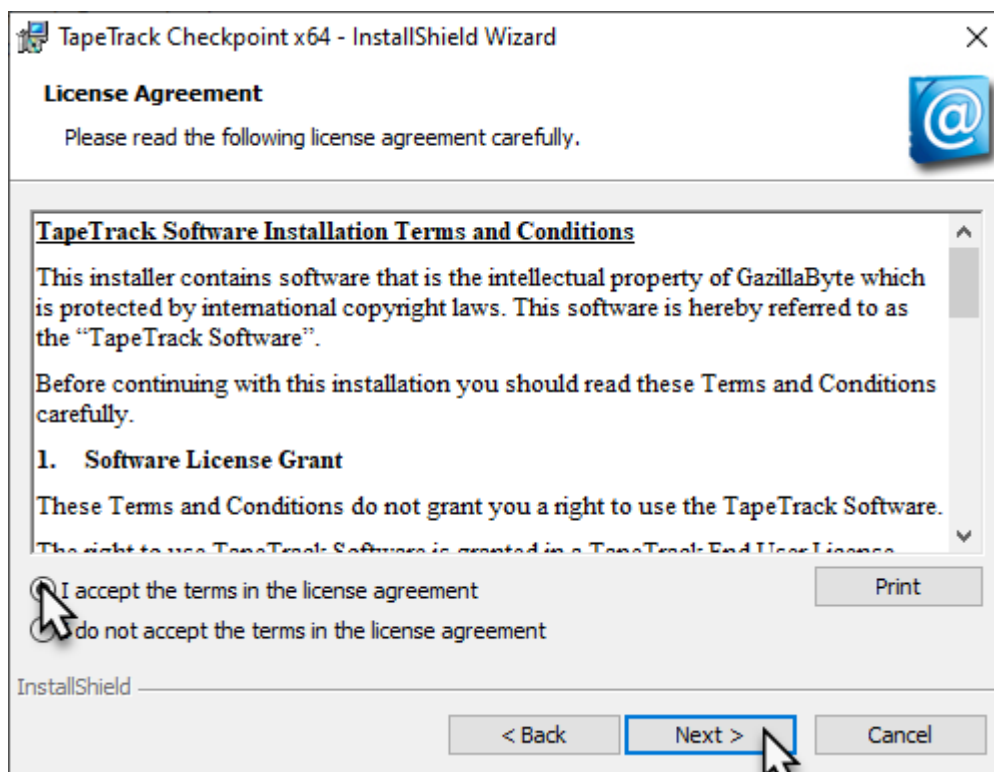

Locate the executable you downloaded, setup.exe, and double click to initiate the installation.

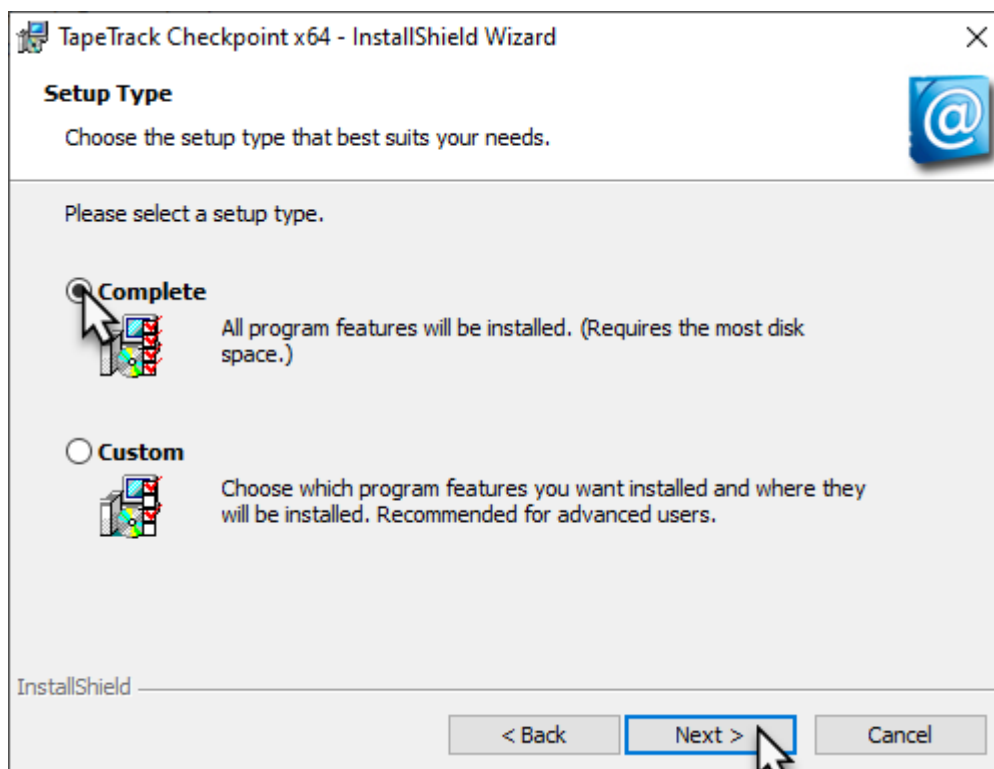

Click Next > to start the Install Shield Wizard.

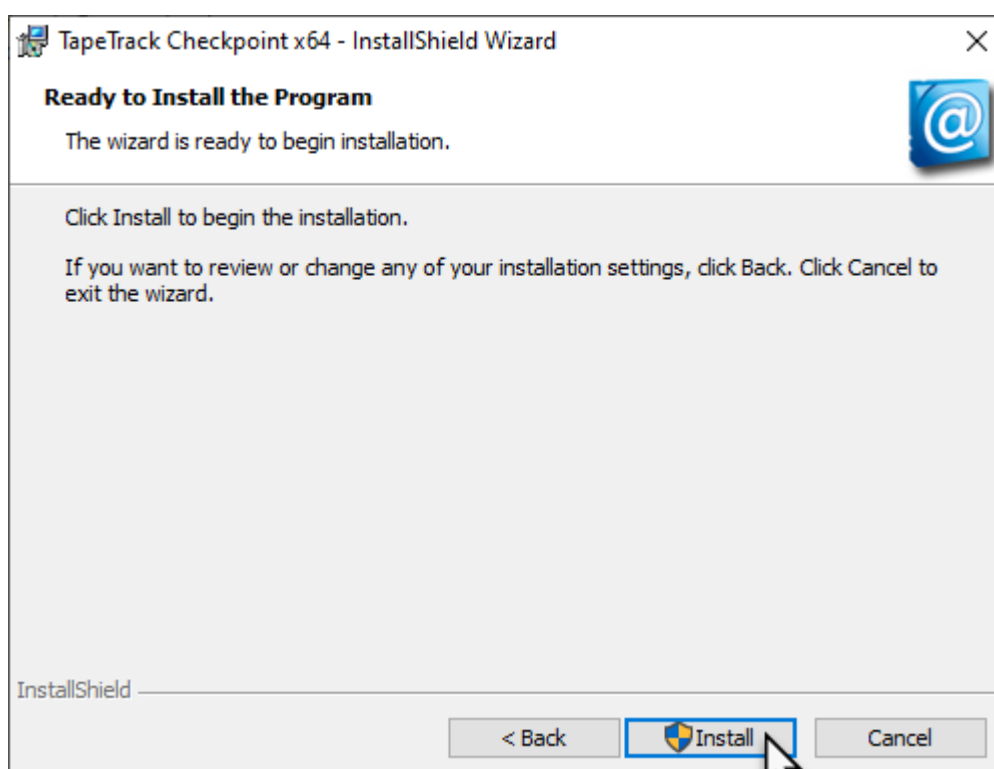

After reading the License Agreement click Next > to proceed.

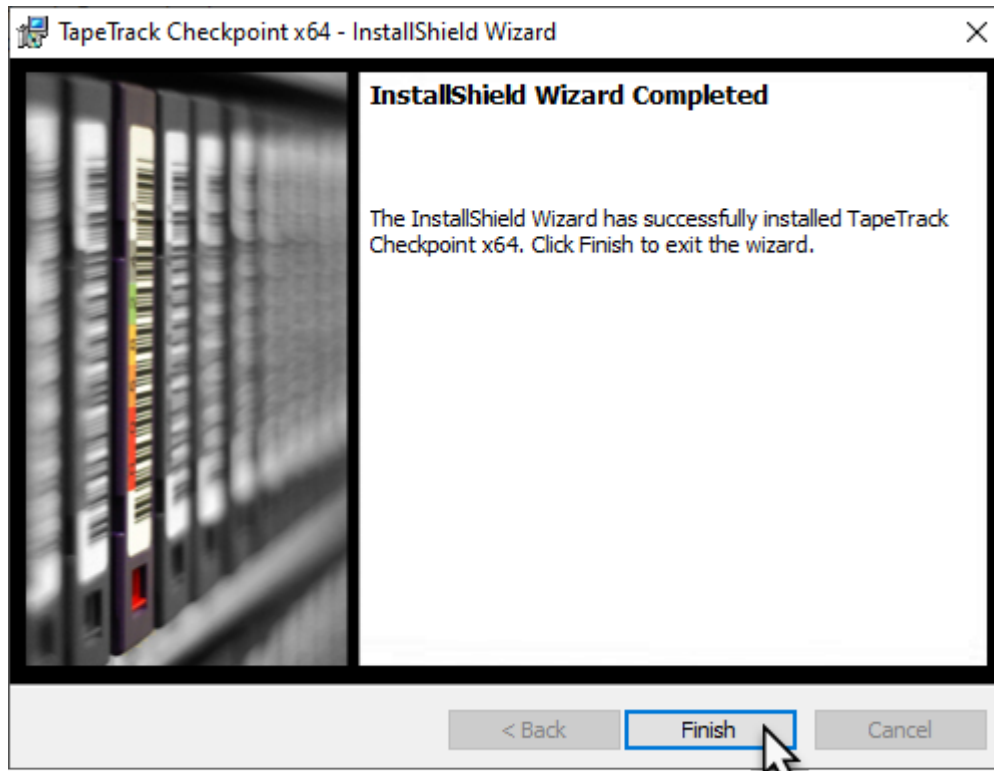

Confirm the installation directory is correct,
or click Change to select another installation directory. Click Next > to proceed.

Click Install to begin the installation

Click Finish to exit the installer.
