

Upgrading Checkpoint

Upgrading Checkpoint is a simple process that maintains your server connection and user details during the uninstallation of your current version and installation of the new release.

Download Installer

- [Lite 64 Bit](#)
- [Lite 32 Bit](#)

Remove Current Installation

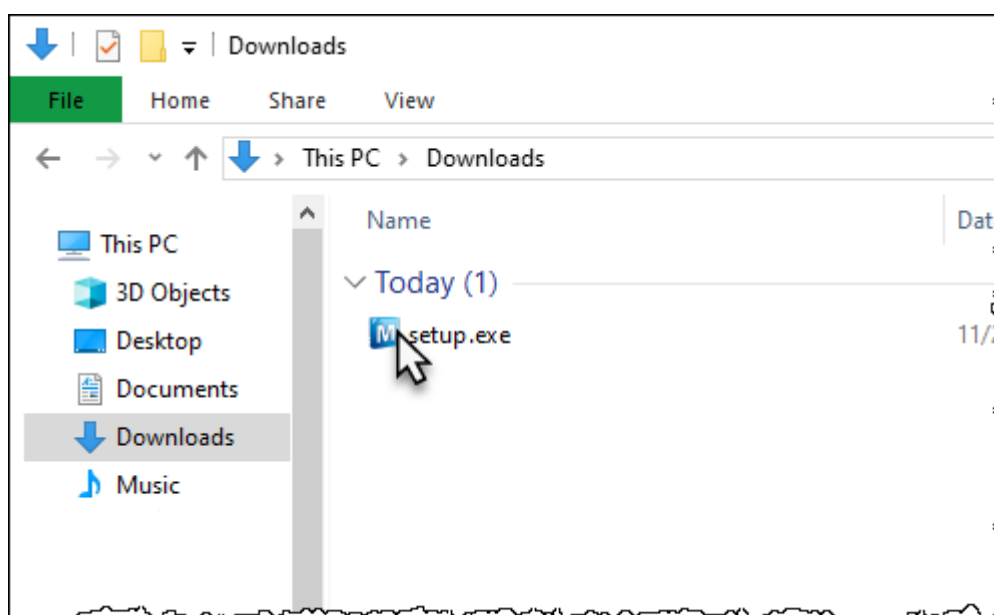

The following instructions are the suggested method for Windows 10.

If you are running another operating system, please follow the instructions for that system.

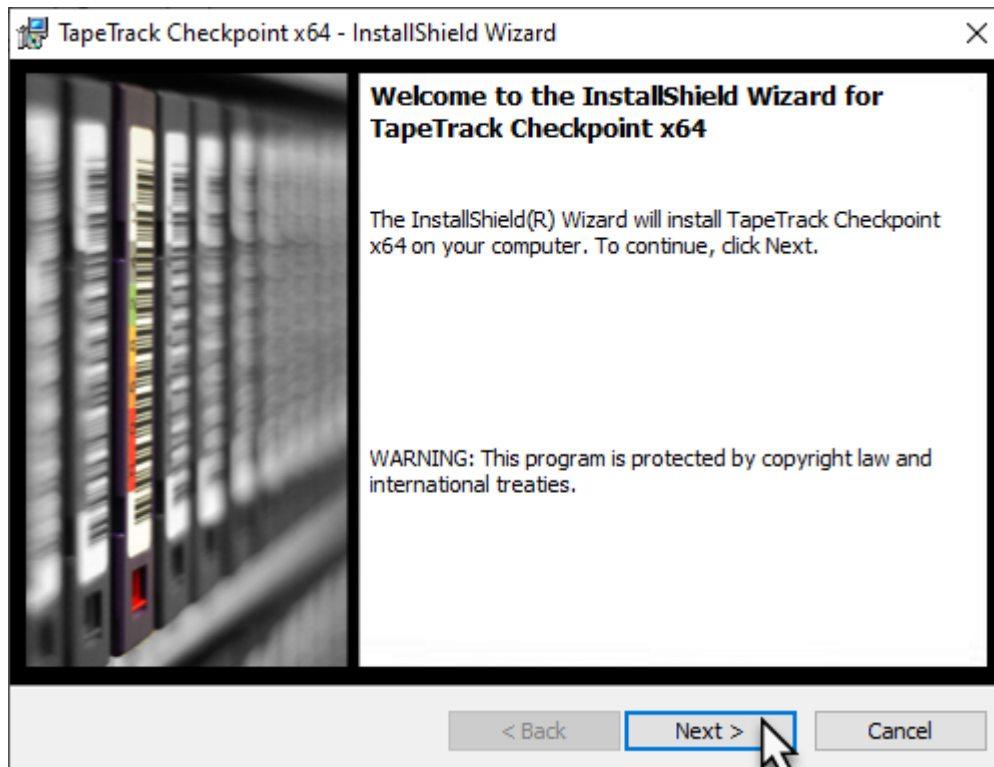

- Open the Start menu.
- Click Settings (Gear icon).
- Click System on the Settings menu.
- Select Apps & features from the left pane to display a list of all installed apps.
- Select Checkpoint from the list by left clicking.
- Click the Uninstall button that appears.
- Click the Uninstall pop-up button to confirm.

Install New Release

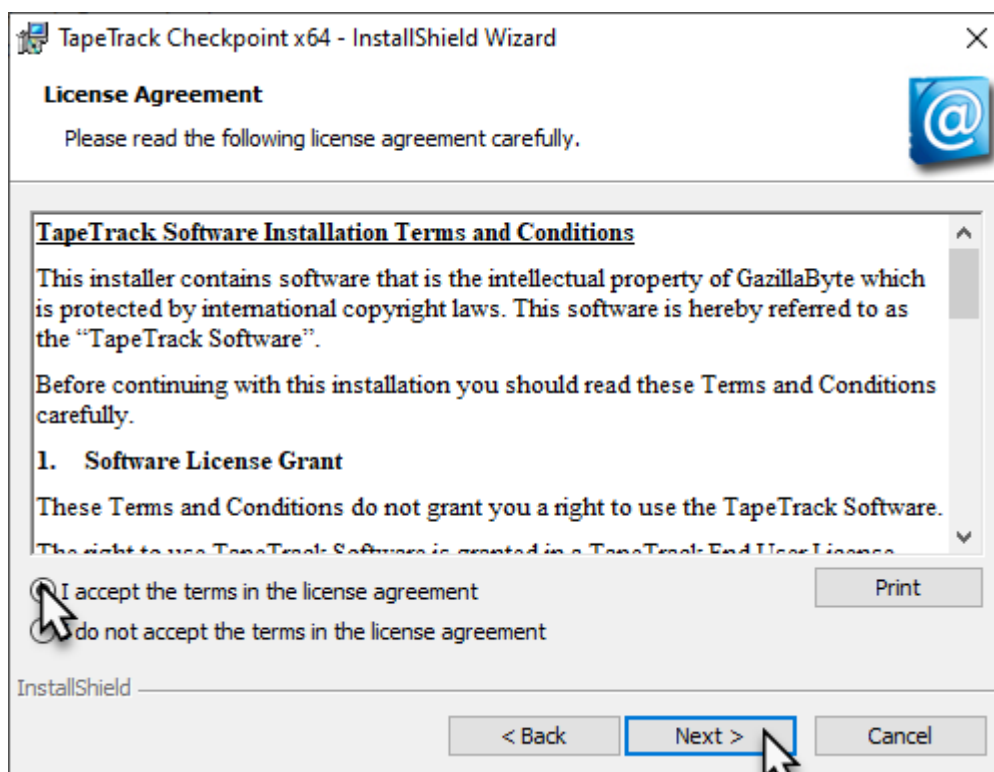

Locate the executable you downloaded, setup.exe, and double click to initiate the installation.

Click Next > to start the Install Shield Wizard.

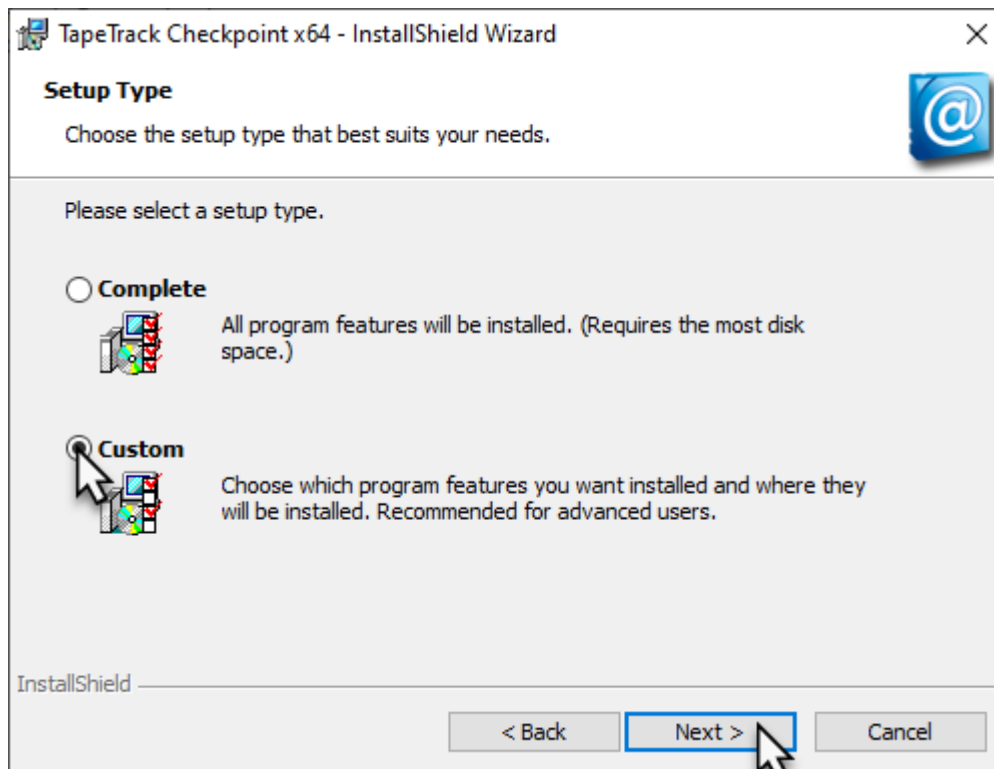

After reading and agreeing to the License Agreement click I accept the terms in the license agreement and Next > to proceed.

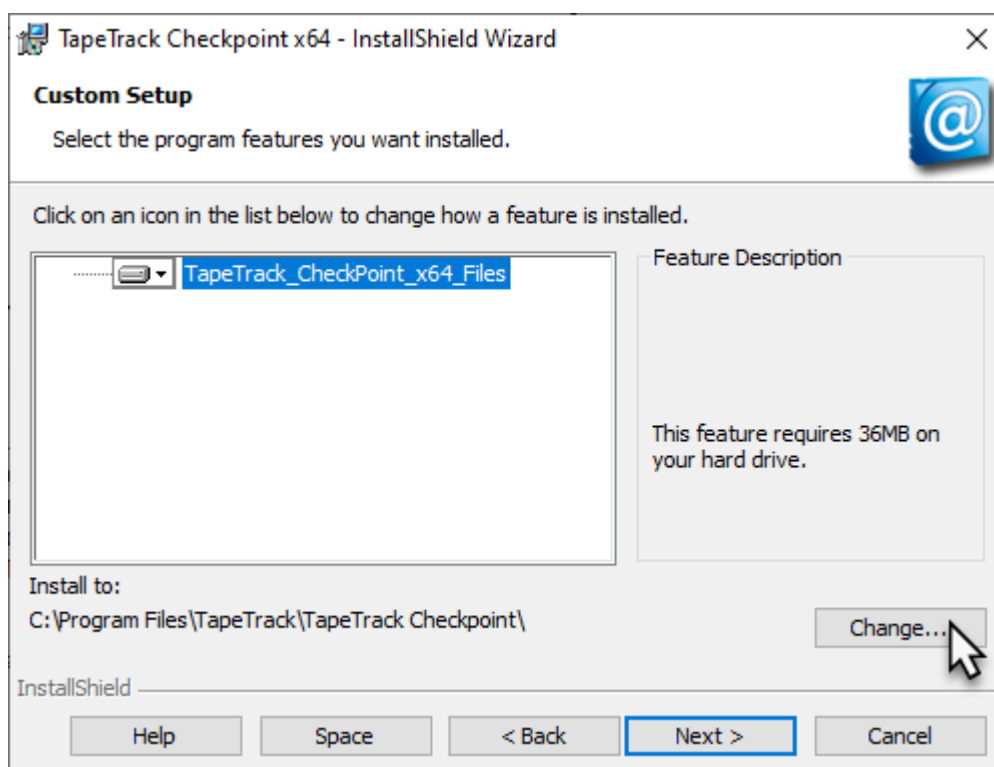

Click Complete to install Checkpoint in the standard install directory C:\Program Files\TapeTrack\TapeTrack Checkpoint and Next to continue the installation.

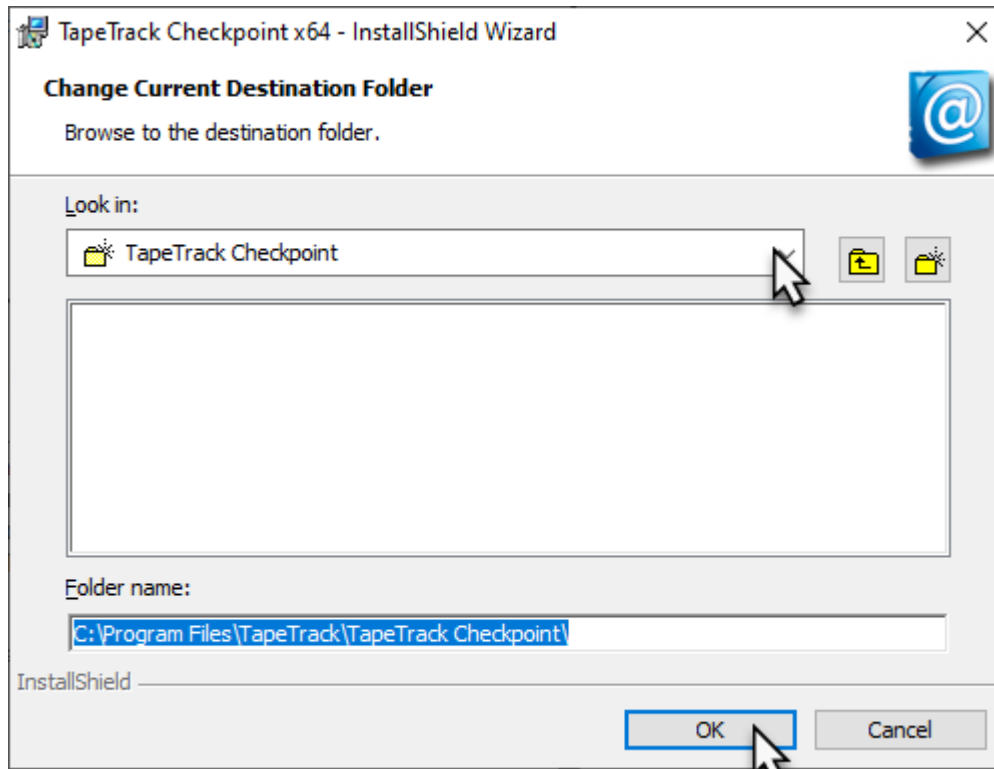

To install in another directory, click Custom and Next.

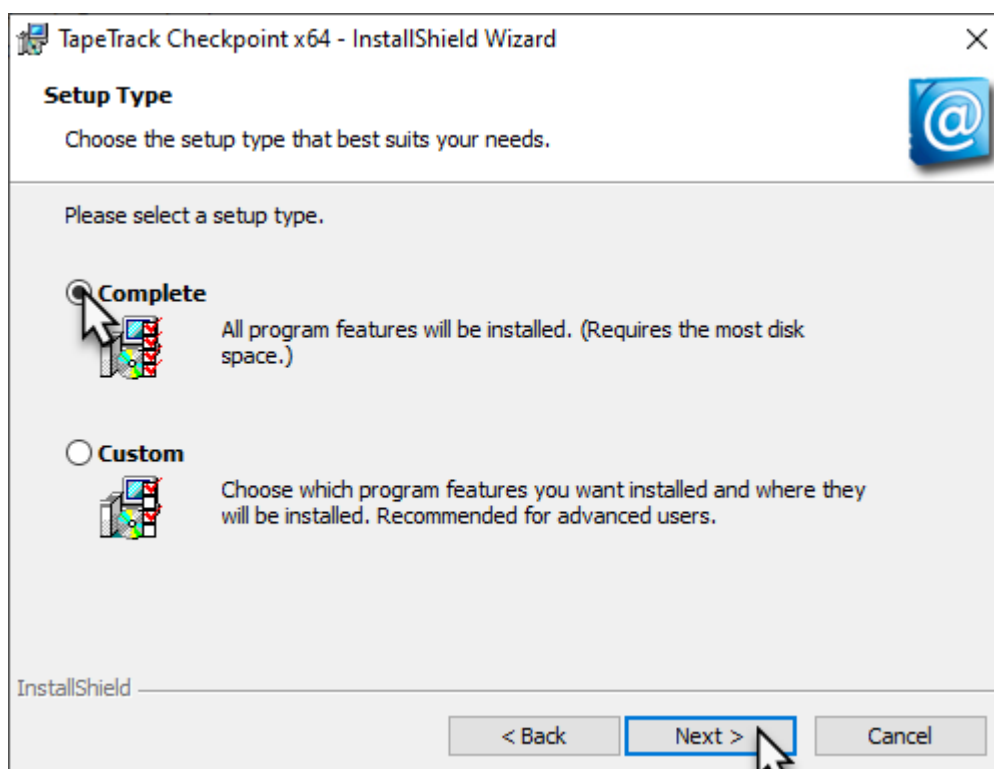

Click Change to select open the installation location window.

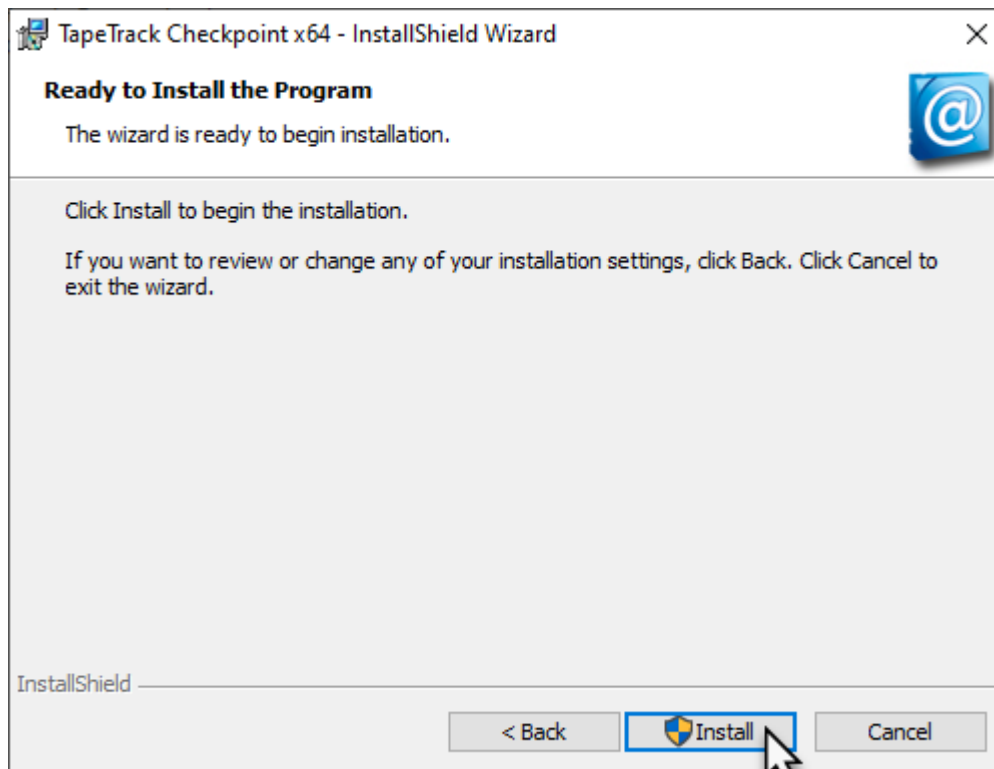

Select the desired installation location and OK to close the window.

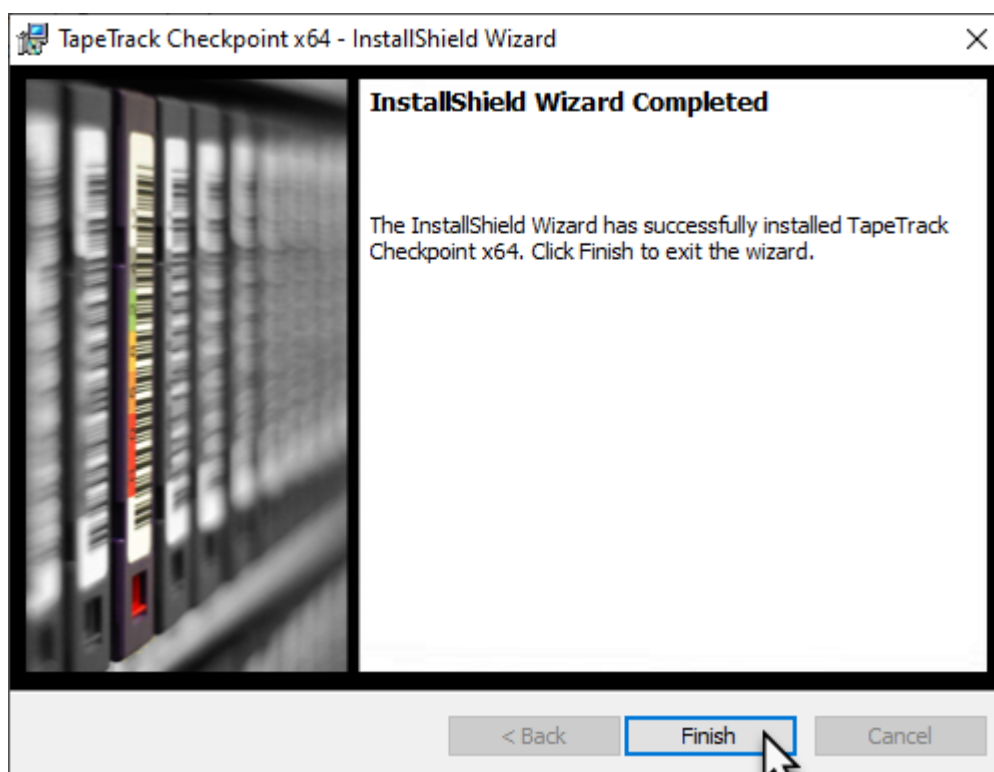

Click Next to proceed.

Click Install to begin the installation

Click Finish to exit the installer.
