Upgrading Checkpoint

Upgrading Checkpointis a simple process that maintains your server connection and user details during the uninstallation of your current version and installation of the new release.

Download Installer

- Lite 64 Bit
- Lite 32 Bit

Remove Current Installation

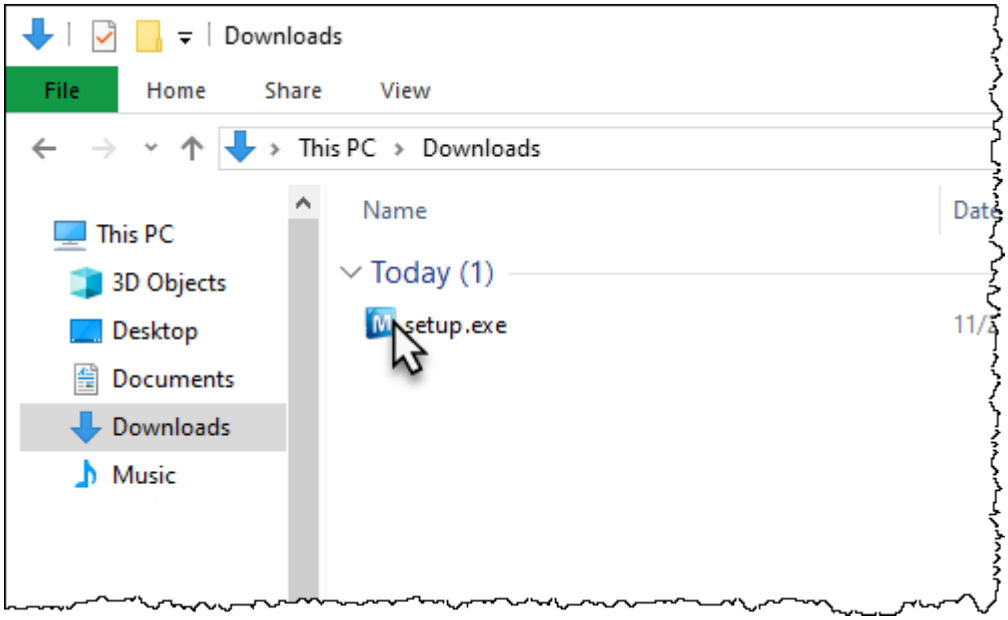

The following instructions are the suggested method for Windows 10.

If you are running another operating system, please follow the instructions for that system.

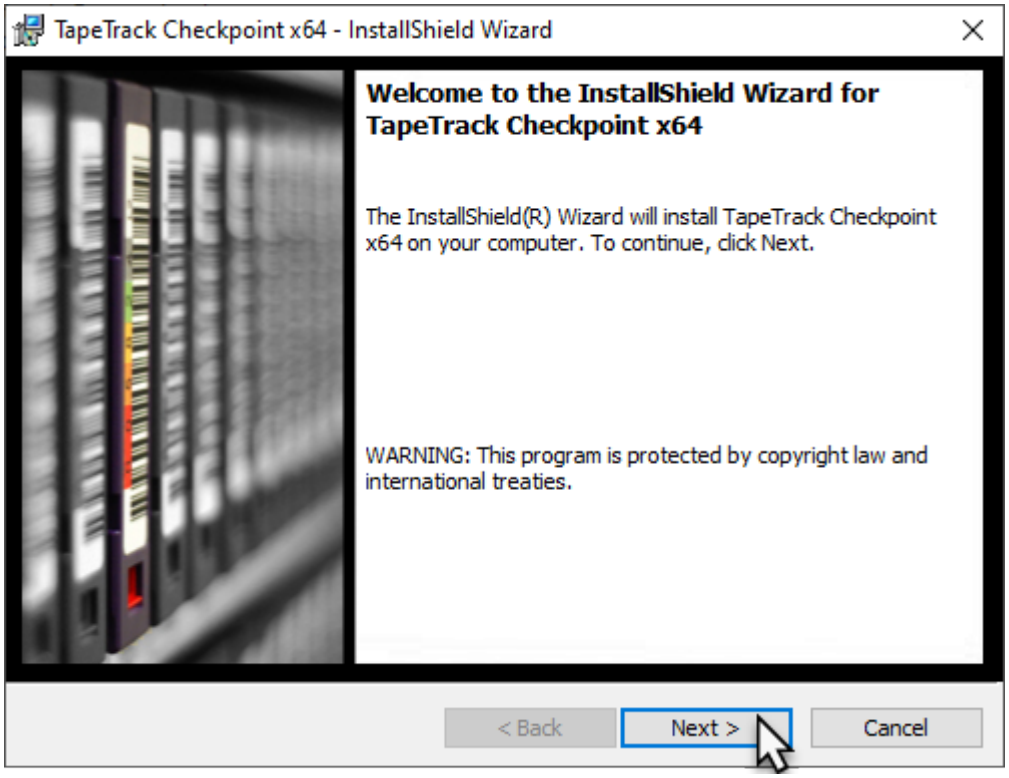

- Open the Start menu.
- Click Settings (Gear icon).
- Click System on the Settings menu.
- Select Apps & features from the left pane to display a list of all installed apps.
- Select Checkpoint from the list by left clicking.
- Click the Uninstall button that appears.
- Click the Uninstall pop-up button to confirm.

Install New Release

Locate the executable you downloaded, setup.exe, and double click to initiate the installation.

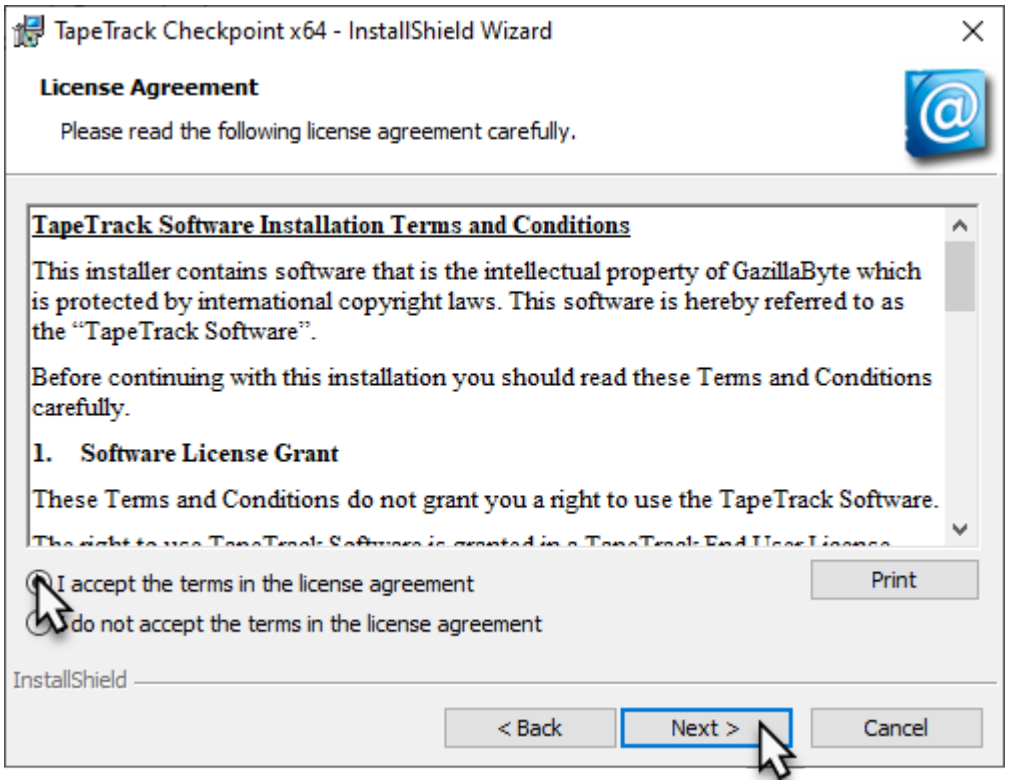

Click `Next >` to start the Install Shield Wizard.

After reading and agreeing to the License Agreement click `I accept the terms in the license agreement` and `Next >` to proceed.

Complete Installation

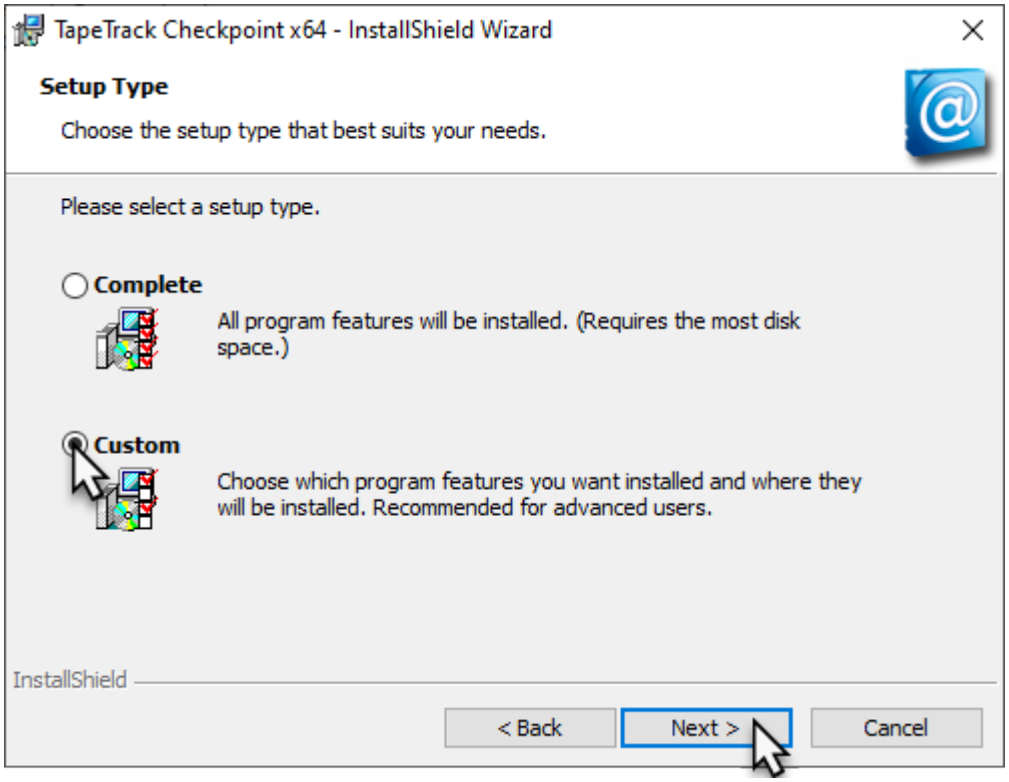

Click `Complete` to install Checkpoint in the standard install directory `C:\Program`

`Files\TapeTrack\TapeTrack Checkpoint` and `Next` to continue the installation.

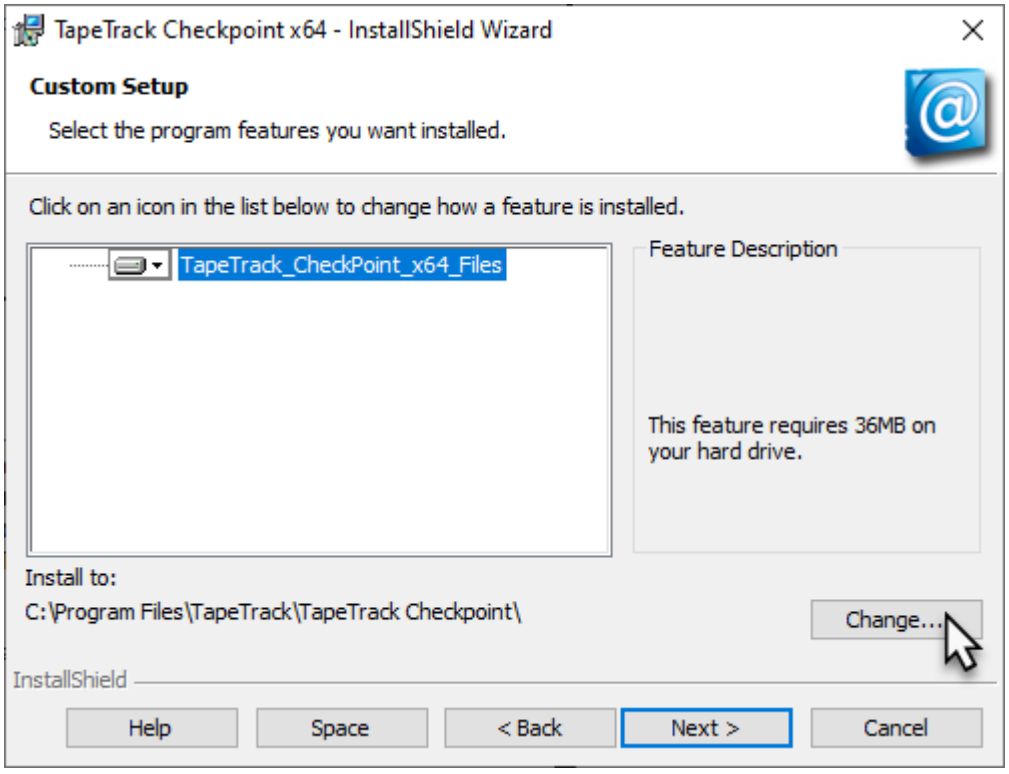

Skip down to Start Installation

Custom Installation

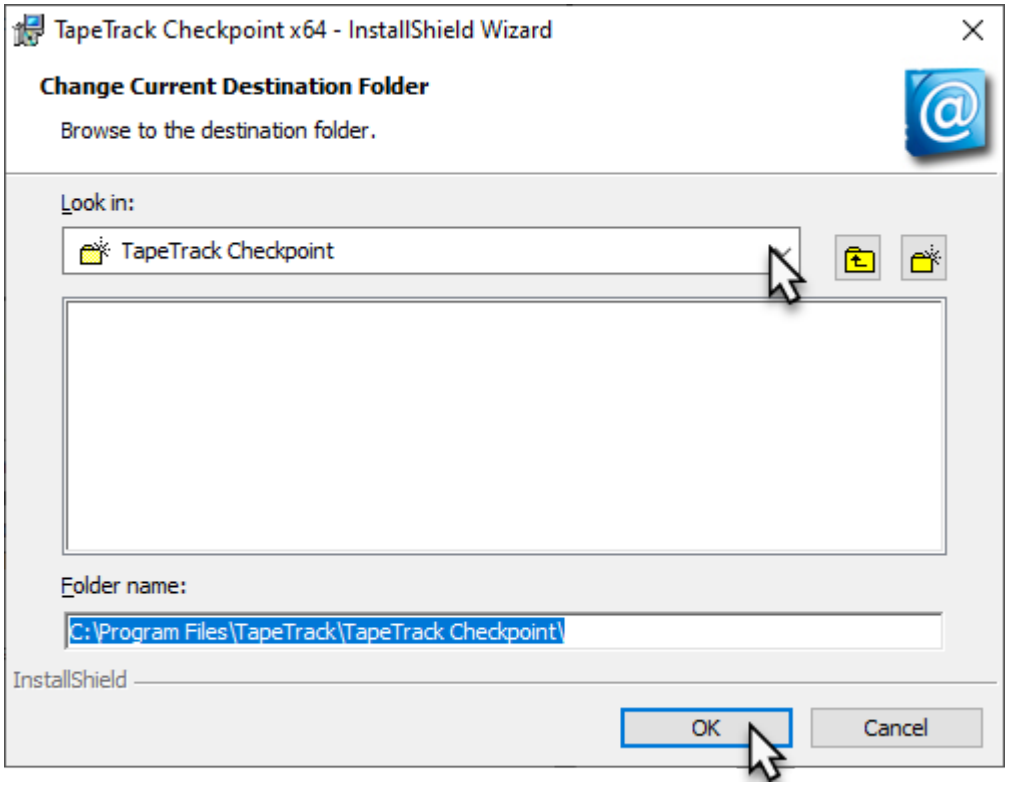

To install in another directory, click `Custom` and `Next`.

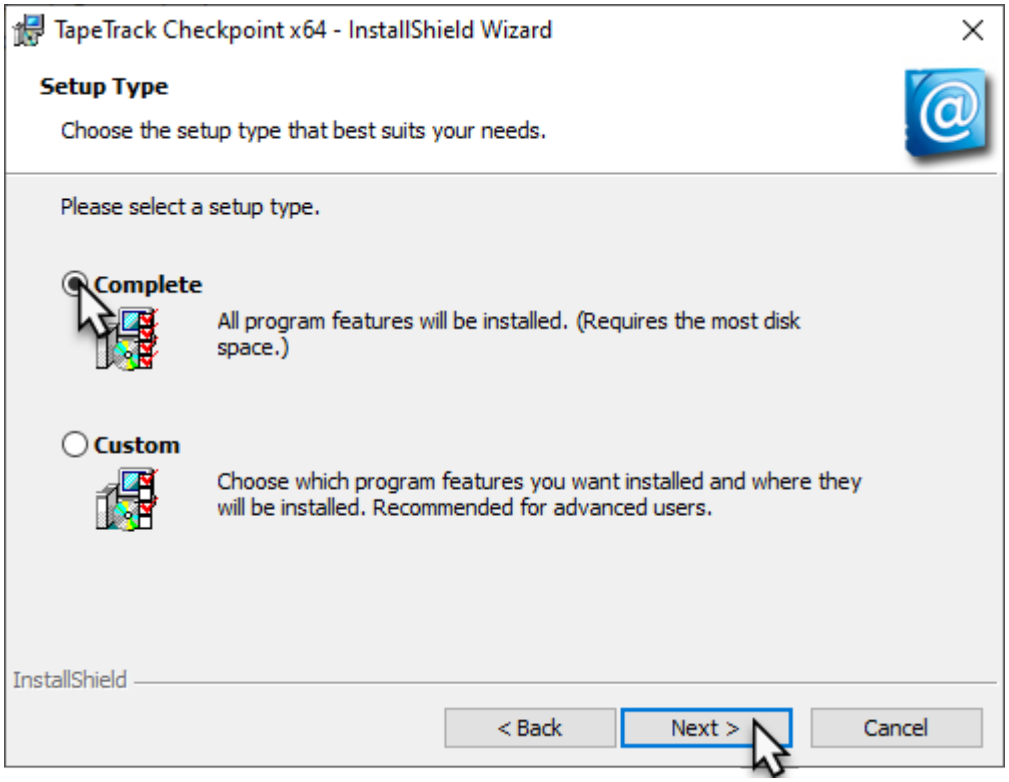

Click Change to select open the installation location window.

Select the desired installation location and OK to close the window.

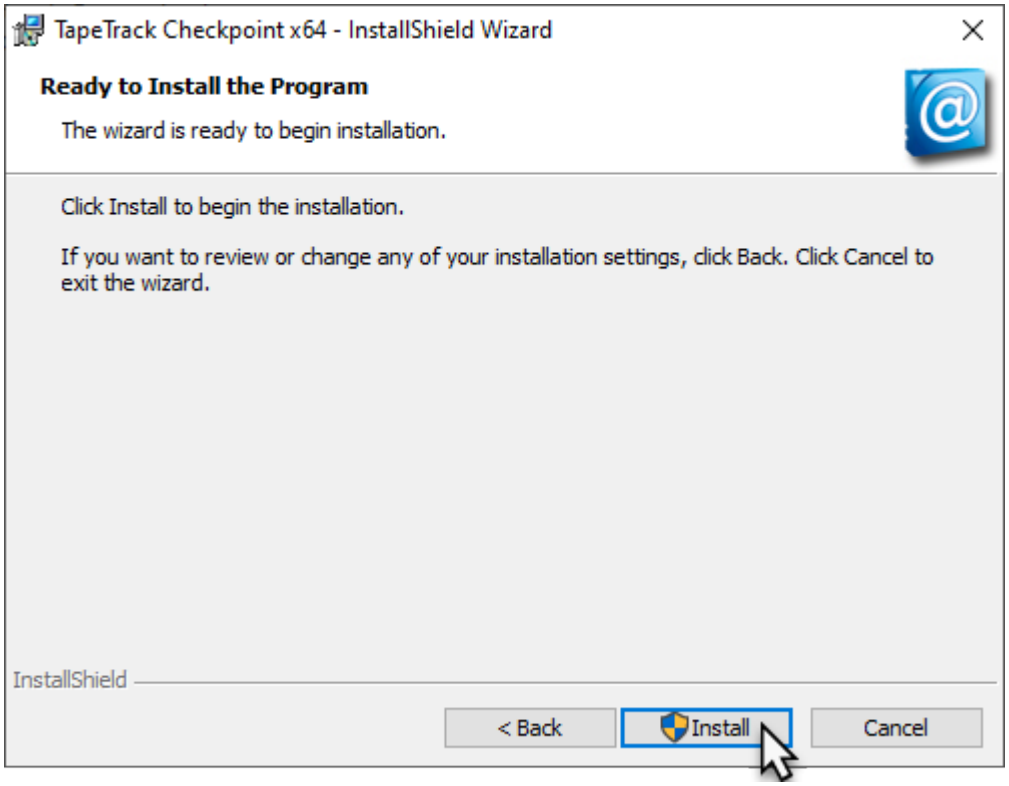

Click `Next` to proceed.

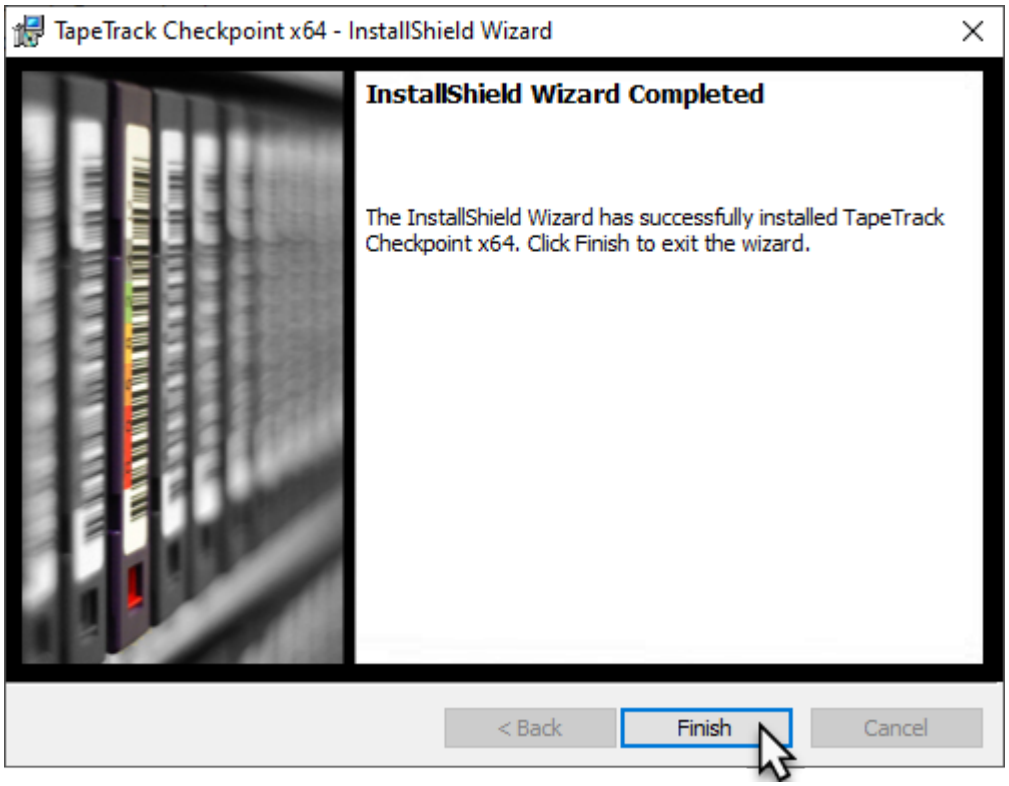

Start Installation

Click `Install` to begin the installation

Click `Finish` to exit the installer.
