Upgrading TapeMaster

Upgrading TapeMaster is a simple process that maintains your server connection and user details during the uninstallation of your current version and installation of the new release.

These instructions are for upgrading TapeMaster only, such as a stand alone install that accesses a Framework Server on a remote connection.

The TapeMaster Configuration file is not removed when TapeMaster is uninstalled. This ensures any modifications to this file will remain and will be used for the next installation, provided it is installed in the same location.

Download Installer

As some firewalls or security settings within your network may prohibit access to downloading the TapeTrack executable, it is always best to download the TapeTrack file before uninstalling your current version to maintain TapeTrack access.

Download the TapeMaster executable:

- TapeMaster 64 Bit

Remove Current Installation

Ensure you have the system permissions required to install the new executable before uninstalling TapeMaster.

The following instructions are the suggested method for Windows 10 via the Start Menu.

- Open the `Start menu`.
- Scroll down the Programs and expand the TapeTrack folder.
- Scroll down and click on the `TapeTrack TapeMaster Uninstall` entry.
- Click `Yes` to the Windows Installer popup to confirm the uninstall process.

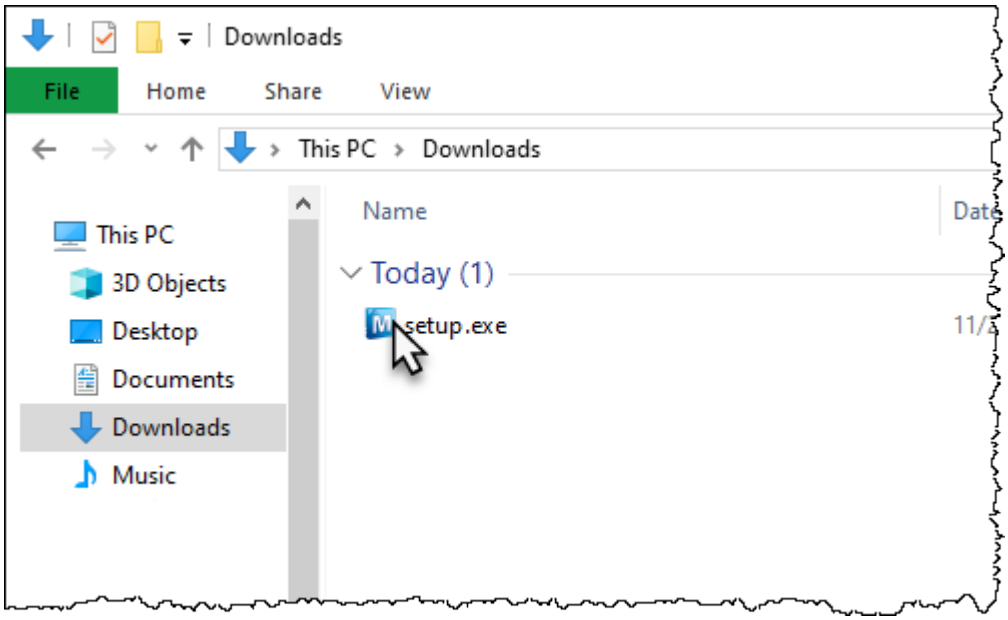

The following instructions are the suggested method for Windows 10 via the Settings Menu

- Open the `Start menu`.
- Click `Settings (Gear icon)`.
- Click `Apps` on the Settings menu.
- Select `Apps & Features` from the left pane to display a list of all installed apps.
- Scroll down and select `TapeTrack TapeMaster` from the list by left clicking.
- Click the `Uninstall` button that appears.
- Click the `Uninstall` pop-up button to confirm.

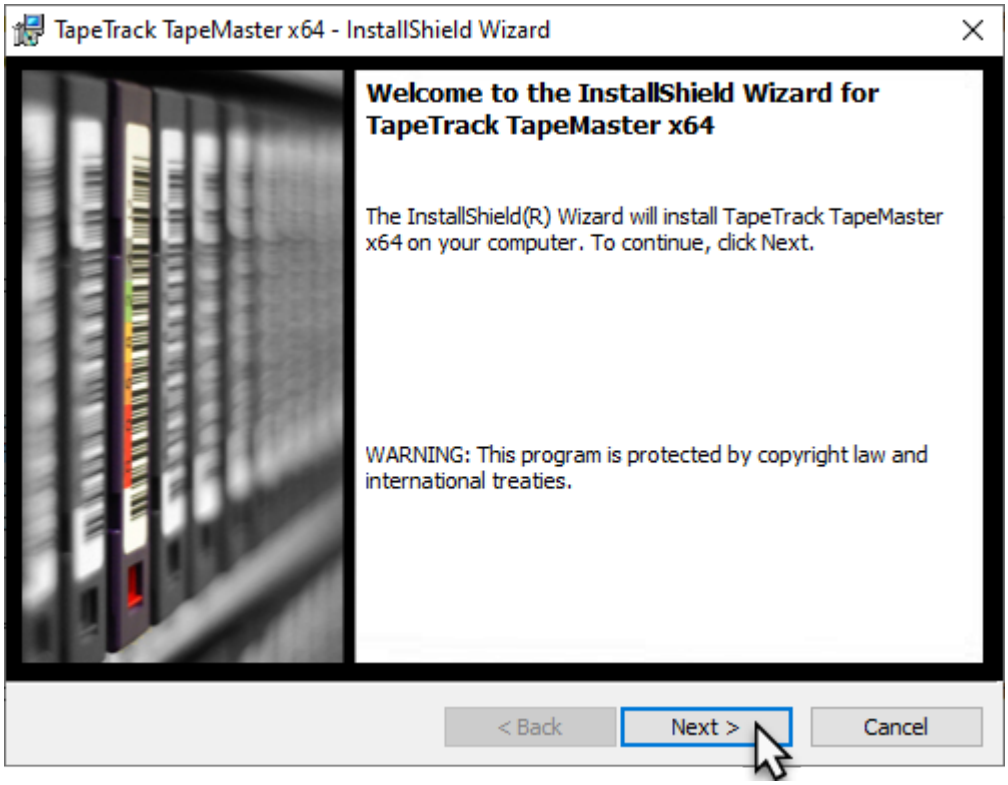

If you are running another operating system, please follow the instructions for that system to uninstall the current version of TapeMaster.

Install New Release

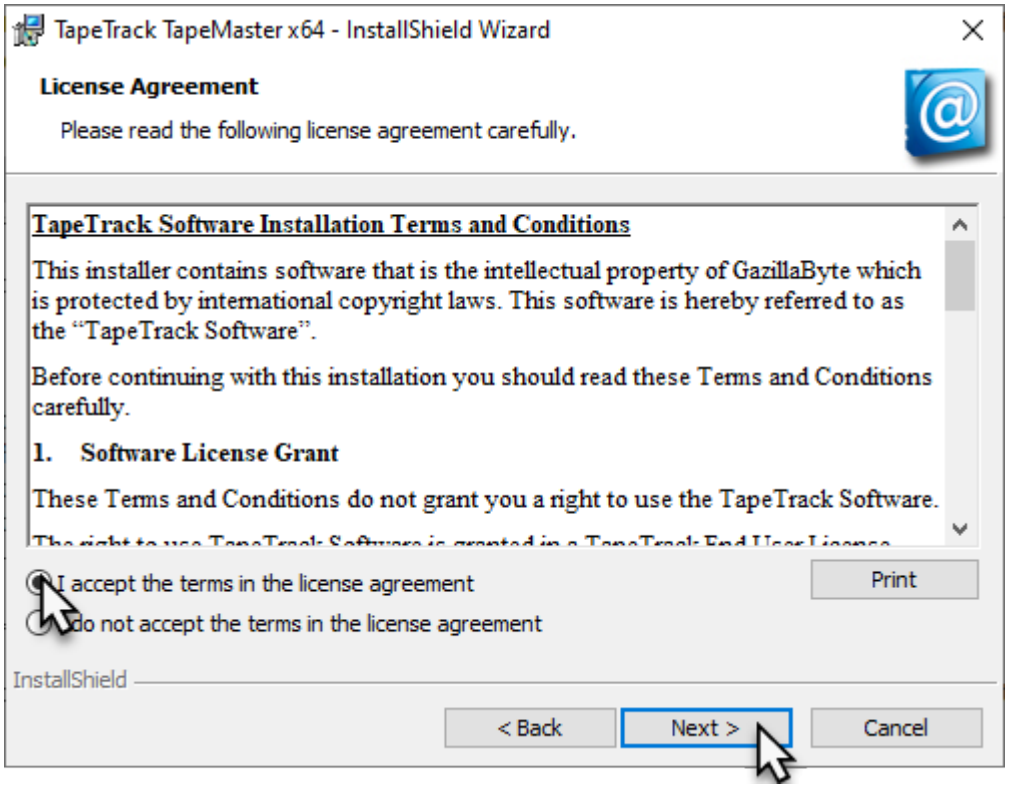

Locate the executable you downloaded, setup.exe, and double click to initiate the installation.

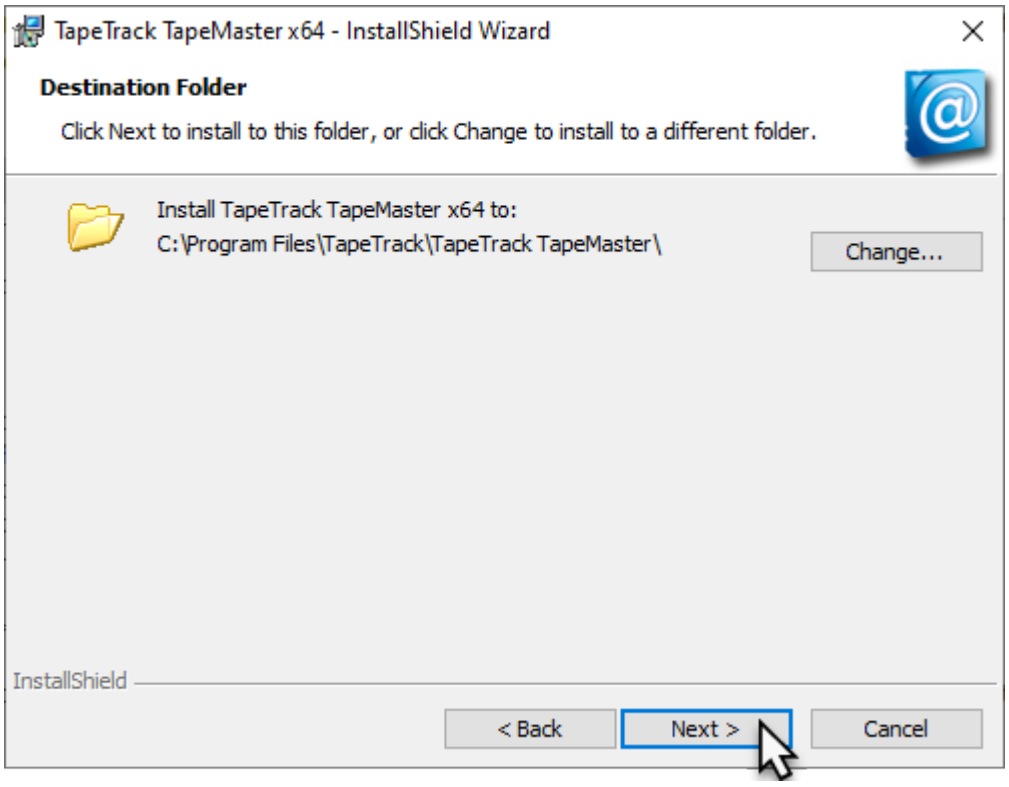

Click `Next >` to start the Install Shield Wizard.

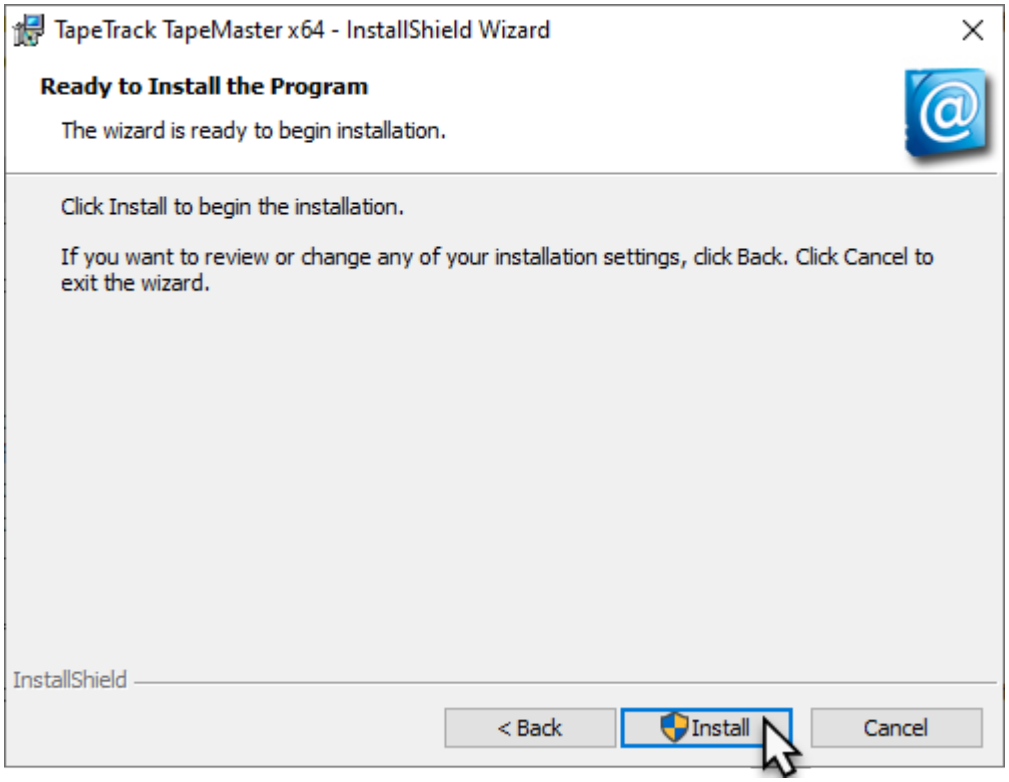

After reading and agreeing to the License Agreement click `I accept the terms in the license agreement` and `Next >` to proceed

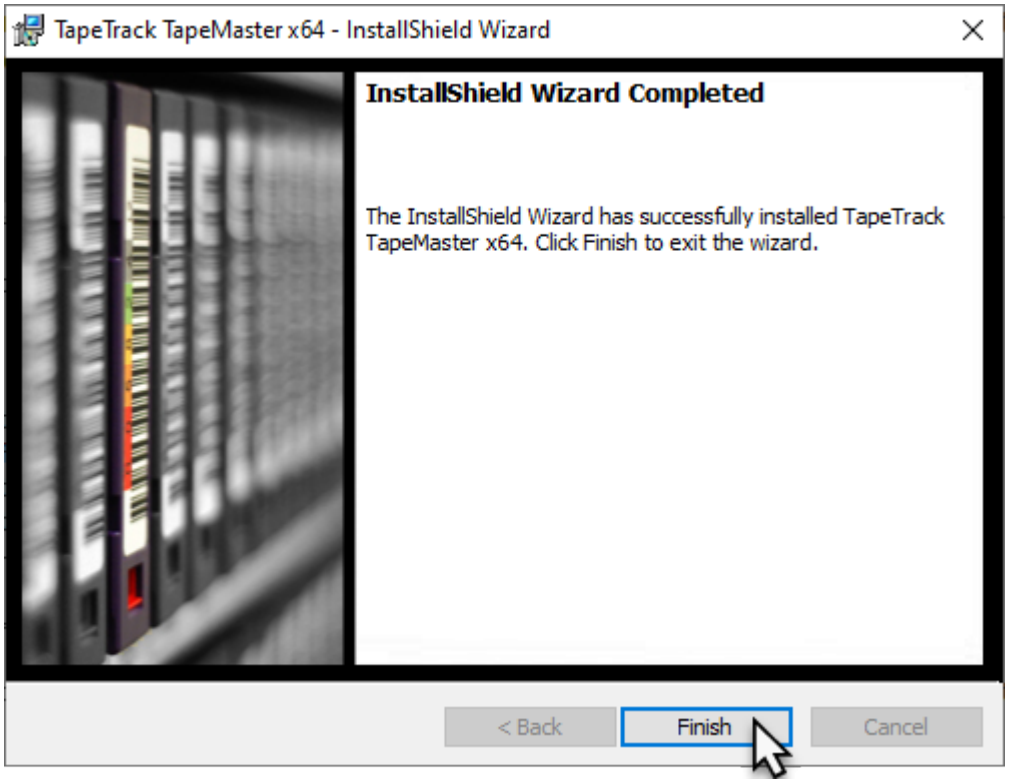

Confirm the installation directory is correct,
or click Change to select another installation directory. Click `Next >` to proceed.

Click `Install` to begin the installation

Click `Finish` to exit the installer.
