

# Troubleshooter: Adding New User ID

The purpose of this troubleshooter is to diagnose why new user-ID can not be added.

To diagnose why you cannot add new user-ID, select the error presented:

## This User Has No Access

Click Yes to return to **Access** tab and [add access rights](#).

## User Update Failed

### Unknown Group-ID

[Select group](#) to assign user to from the drop-down list or [add new group](#).

### Illegal Key Value Was Specified

User-ID is either blank or has an illegal character, or starts with a space, period or dash.

Ensure user-ID follows [usercorrect user-ID protocol](#)
