Troubleshooter: Adding Volumes

The purpose of this troubleshooter is to diagnose why Volumes in TapeTrack cannot be added.

To diagnose why you cannot add Volumes, select the error presented:

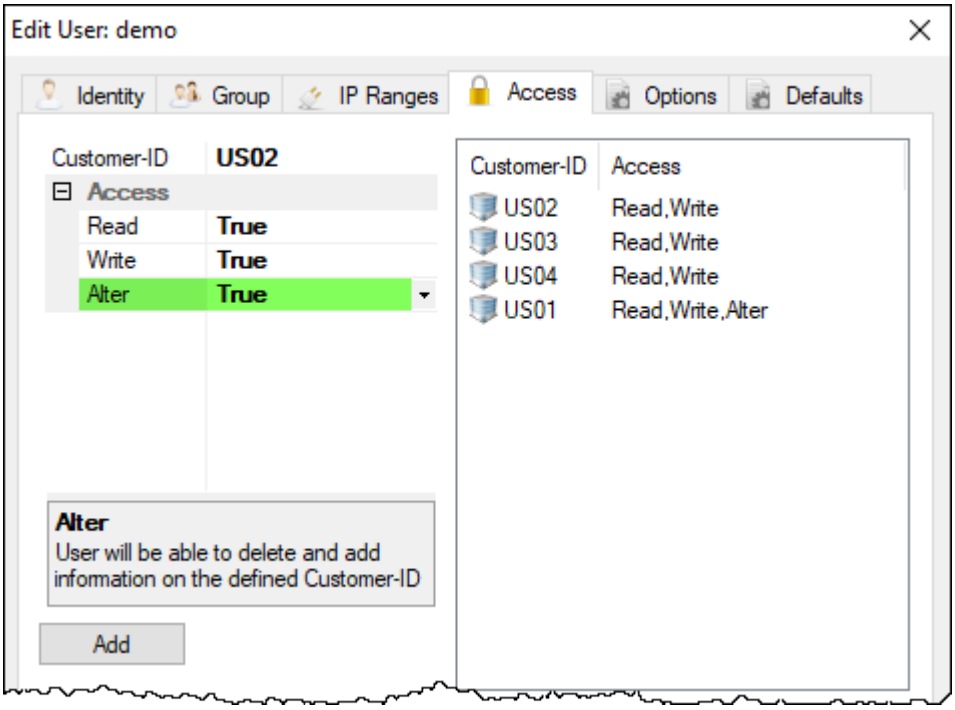

Security does not allow this operation

The error **Security does not allow this operation** indicates your user ID does not have sufficient access rights to add volumes to TapeTrack.

To add Volumes from TapeTrack you will need to either:

- Have you administrator raise your access to include **Alter** rights.
- Have a User with **Alter** rights add the Volumes for you.

Target Repository Unknown

The error **Target Repository Unknown** indicates that there is no current default Repository to add a new Volumes too.

To add new Volumes you will need to either:

- Set a current default Repository in TapeMaster by right clicking the required repository|Repository and selecting `Make Default Repository`.
- Right click the required target Repository in TapeMaster and selecting `Scan→To Add` and Scan in the new Volumes.
