

Troubleshooter: Slotting Not Previously Setup

Slotting is not setup to run by default, to enable slotting a number of setup tasks must be performed:

1. [Slotting must be enabled](#) in the options for the repository requiring slotting.
2. [Zones](#) must be [assigned to the repository](#).
3. There must be a sufficient number of free slots available to accommodate every volume that currently requires a slot.
4. The [slotting program](#) must be called, either manually or via a scheduler such as Windows Scheduler or crond.
5. The [slotting program](#) must be called with the right arguments, including the right server name or address and valid credentials.
