Troubleshooter: Slotting

The purpose of this troubleshooter is to diagnose why volumes in TapeTrack are not being slotted.

The symptom of slotting not working is that when volumes are moved to a repository that has slotting enabled, the volume does not automatically get a slot assigned.

To use the troubleshooter click on the appropriate yes or no button.

Was slotting previously working?

Slotting is not enabled by default.

There are several steps that need to be setup before slotting will occur automatically so if slotting has not previously been enabled please select No.

Was slotting previously setup?
