Troubleshooter: Slotting

The purpose of this troubleshooter is to diagnose why volumes in TapeTrack are not being slotted.

The symptom of slotting not working is that when volumes are moved to a repository that has slotting enabled, the volume does not automatically get a slot assigned.

To use the troubleshooter click on the appropriate **Yes** or **No** button.

===== Was slotting previously working? =====

Slotting is not enabled by default.

There are several steps that need to be setup before slotting will occur automatically.

Was slotting previously setup?
