Troubleshooter: Slotting

The purpose of this troubleshooter is to diagnose why volumes in TapeTrack are not being slotted.

The symptom of slotting not working is that when volumes are moved to a repository that has slotting enabled, the volume does not automatically get a slot assigned.

To use the troubleshooter click on the appropriate **Yes** or **No** button.

<hidden  Yes slotting was previously working>

</hidden>

<hidden  No slotting was not previously setup>

</hidden>
