

Troubleshooter: Slotting

The purpose of this troubleshooter is to diagnose why volumes in TapeTrack are not being slotted.

The symptom of slotting not working is that when volumes are moved to a repository that has slotting enabled, the volume does not automatically get a slot assigned.

Yes, slotting was previously setup

If slotting was previously setup and has stopped working then something has changed.

Slotting was previously run manually

*

Slotting was previously run automatically

*

No, slotting was not previously setup
