Troubleshooter: Slotting (Previously Working Automatically via Scheduler)

When the slotting script runs it produces two output files (slotting_error.txt and slotting_report.txt) written to the reports folder within your TapeTrack installation.

Default installation location within the TapeTrack directory is TapeTrack\TapeTrack Framework Server\var\reports. The directory location is set by the variable %TMSS10SCRIPTS% whose location can be found by running the command SET in a command line window.

The file slotting_error.txt will contain any errors encountered when running the slotting script.

Error Present

Logon failed: User-ID is undefined

Logon failed: Authorization failure

Logon failed: Logon failed as access has been revoked

Customer List successful: Customers(0) Excluded( )

Resolution of hostname failed: No such host is known

Different error or Unable to identify error
