TMSS10BACK

The variable TMSS10BACK contains the full path to a directory that can be used to backup the TapeTrack Database.

This location is set when the TapeTrack Framework Server is installed. If the database relocated this variable will need to be reset to the new location.

Executing the command **set** in a Windows Command Line will display, among other information, the variable TMSS10DB and its full path.

Example

<sxh> set TMSS10DB=C:\Program Files\TapeTrack\TapeTrack Framework Server\var\db </sxh>

environmental variables, paths
