

TMSSCMDSTRING

The [Environmental Variable](#) TMSSCMDSTRING changes the behavior of [Command Line Programs](#) to take the value set in TMSSCMDSTRING and write that string, along with the variables to stdout.

This allows you to write commands automatically using the value TMSSCMDSTRING along with the values contained in the output from the [Command Line Programs](#).

Example

Using TMSS10MoveList output as an example, the standard output displays Volume-ID, Current and Target location as well as move times and attributes.

<sxh>

System: TapeTrack
Report ID: 102

Report Description: Moving Volumes List

Report Notes: Customer(New York Data Center) Media Type()
Production Time: Monday, April 20, 2020 - 12:35:59 (AUS Eastern Standard Time)
Report Width: 176 bytes
