# TMSSEXCELOUTPUTPATH

Specifies the output path name for when a Microsoft Excel file is created.

## Example

<sxh> set TMSSEXCELOUTPUTPATH =“C:\Program Files\TapeTrack\TapeTrack Framework Server\var\reports” </sxh>

The default value is `Sheet-YYYY-MM-DD-HH-MM-SS.xls`, where `YYYY-MM-DD-HH-MM-SS` is the date and time the report production started.

environmental variables, printing, exporting, excel
