TMSSPDFCOLORHDR

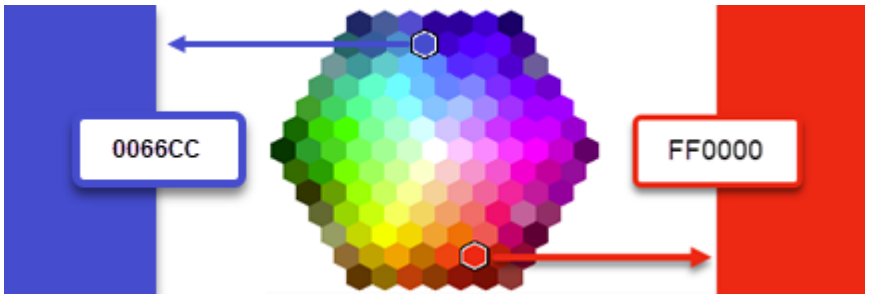

The Environmental Variable TMSSPDFCOLORHDR changes the color of the PDF report header background or title bar using HEX number input (without the #).

The Environmental Variable TMSSPDFCOLORHDR will set the color for all report headers.

If used in conjunction with the Report-ID, eg TMSSPDFCOLORHDR100, it will override the global color set for that report. For example TMSS10MoveList produces three reports (Report 117, 118 and 119)

Example

To change the title bar to Red

Windows Command Line

```
set TMSSPDFCOLORHDR=FF0000
```

Windows PowerShell

```
$env:TMSSPDFCOLORHDR = "FF0000"
```

environmental variables, reports, pdf
