TMSSPDFCOLORHDR

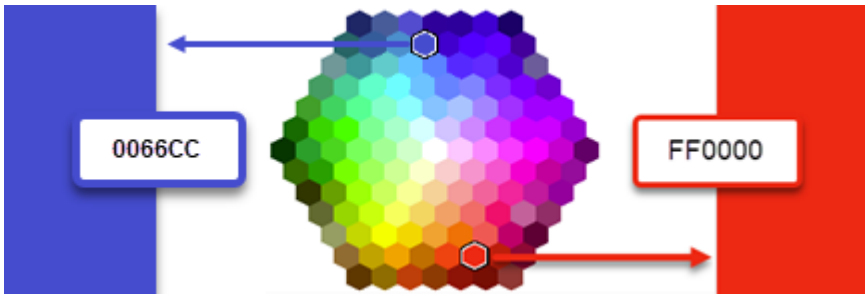

The Environmental Variable TMSSPDFCOLORHDR changes the color of the PDF report header background or title bar using HEX number input (without the #).

The Environmental Variable TMSSPDFCOLORHDR will set the color for all report headers.

If used in conjunction with the Report-ID, eg TMSSPDFCOLORHDR100, it will override the global color set for that report. For example TMSS10MoveList produces three reports (Report 117, 118 and 119), setting TMSSPDFCOLORHDR to red and TMSSPDFCOLORHDR117 to blue would produce a PDF report with 117 with a blue title bar, 118 and 119 having a red title bar.

Example

To change the title bar to Red

Windows Command Line

```
set TMSSPDFCOLORHDR=FF0000
```

Windows PowerShell

```
$env:TMSSPDFCOLORHDR = "FF0000"
```
