TMSSPDFLOGOPATH

The Environmental Variable TMSSPDFLOGOPATH defines the fully qualified path of a JPG image that is to be used when the TMSSREPORTFORMAT specifies PDF output.

Correct full path to logo file must be used. Incorrect path will cause an error and report creation terminated

The logo file, to avoid any distortion, should be 400 pixels wide by 200 pixels high.

If your logo does not fit these dimensions, use white space padding around your logo to pad it out to a ratio of 2:1 high format

Example

<sxh> set TMSSPDFLOGOPATH="C:\Users\GazillaByte\report_logo.jpg" </sxh>
